

What's built today.

A colourful map of every working piece
— for people who will use it, not build it.

India company setup

Client + firm together

Name → incorporate → register

Then yearly filings

One workspace for a new India company.

Everyone gets a different desk.

SUPER ADMIN

Bird's eye

Jumps into any desk. Tiny gold badge. Sees if projects need attention.

FIRM ADMIN

The office

All people. All projects. Assigns a manager. Approvals, files, audit.

PROJECT MANAGER

The owner

Only their companies. Accepts the lead's work. Emails the client.

PROJECT LEAD

The doer

Today's queue. Fills steps. Asks manager. Files with MCA / GST / RBI.

CLIENT

The company

Inbox first. One step at a time. Uploads. Invites a teammate.

After login they land on their own home

Super can open every home

Admin sees the whole firm

Manager sees only their book

A small **public website.**

Signing in & your account.

A launch pad, not a daily desk.

Overview home

How many companies

How many need attention

How many on track

Open firm console

Admin world

Open client portal

See what clients see

Firm audit

Full activity trail

Client audit

Same trail, client lens

Gold chip only — not a gold website

May enter every menu

Has settings too

The office console.

Audit log

Who did what

Must pick a manager when creating a project

Can resend the welcome email

Can hide a project (soft delete)

Settings · password

Same tools, **only your book.**

Create project — one form.

Company name

India or foreign parent

Pvt Ltd · LLP · partnership · proprietorship

Parent name & address

If already incorporated: India subsidiary name & address

Where to start: name / later stage

Health: on track · at risk · late

One or many project leads

One or many managers

Client name · email · temp password

Saves as you type (until you submit)

Creates the client login + welcome mail

Fill

Create

Welcome email

Open project page

Client can sign in

A company can have many people.

Client owner

primary contact

More clients

invite from Team page

Hand over

substitute · self signs out

The company project

one record, many seats

Progress CC emails · extra copies

Lead (main)

More leads

Managers

main + extras

Four chapters. ~34 steps.

CHAPTER 1

SPICE+ Part A

Name of the company · 5 steps

CHAPTER 2

SPICE+ Part B

Incorporate · 7 steps

CHAPTER 3

After incorporation

Bank, capital, auditor · 11 steps

CHAPTER 4

Registrations

GST, PF, FEMA... · 23 steps

Client walks in order. Lead may open any step. “Operations ready” exists in the background but is hidden from the main menus.

SPICe+ Part A flow.

SPICe+ Part B flow.

NOTE

FEMA sits inside Registration — not a fifth chapter

Client waits. Lead does not.

CLIENT

Done

Open now

Locked

Locked

Saving a draft does not open the next step. Finish / submit / deliver does.

PROJECT LEAD

Any step

Any step

Any step

Jump around to prepare. Client still only sees the current open door.

"This opens after {step} is complete."

Never "access denied"

Send back to client → later steps lock again

Late badge only on the current step

Mark not applicable

Six statuses. Coloured chips only — never a whole red page.

Not started

In progress

Awaiting client

Completed

Overdue

Not applicable

Your step

lead should work

Waiting on the client

Needs manager

Corrections requested

Lead screens hide the wordy status chips and hide “working days” countdowns — quieter on purpose.

Today → company → one step.

Four rows. Not a busy dashboard.

Company name + extra email copies

SPICe+ Part A · ticks · open first unfinished step

SPICe+ Part B · ticks

Post-incorporation · ticks

Registration · grouped headings · ticks

Back chevron beside the title

Click a row → jump in

Phase colours on the little nodes

A quiet **workbench**.

LEFT · THE FORM

Text**Long note****Date****Yes / no list****File**

Short fields sit in pairs. Long ones take the full row. Some questions appear only if you answered “yes”.

RIGHT · THIS CHAPTER ONLY

The path of the current chapter — not all 34 steps. Person icon: client vs lead. Attachments tick in a small menu.

Autosave while typing**Save button only if something is pending****Tabs along the top · last tab is Submit****Earlier tabs have Next****Ask manager to approve****Email manager again****Deliver to client portal****Compact file drop (not a huge box)**

Inbox first. Then the flowchart.

Inbox

what we need from you

Incorporation

the gated map (this is progress)

Compliances

recurring filings

Documents

papers shared with you

Team

invite or hand over

Activity audit

your company's trail

Settings · change password

No chat page (old Messages button goes nowhere useful)

Old "Progress" page now opens Incorporation

Three piles of “please do this”.

Due today

Blue stripe. Do now.

This week

Coming soon.

Later

No rush date, or further out.

File requests from the lead

“Please fix this step” after a reject

Upload from the inbox

Done items sit separately

Lead asks. Manager accepts or sends back.

Board resolution — draft then release.

More than one **Word** pack.

Board resolution

DIR-2 (director consent)

DIR-8 · INC-9 drafts

MOA / AOA subscription sheets

Share with client

Download pack

Signed board resolution upload

On-screen Word preview

Four drawers. Not one messy folder.

ON A STEP

Milestone uploads

KYC, letters, photos. Safe download links.

CLIENT

Documents

Only what the firm shared.

STAFF

Doc vault

Firm papers for a project.

STAFF

Knowledge Bank

Playbooks. Clients cannot see. Lead may add their own.

Two pipes. One compose screen.

CLIENT → FIRM

Automatic email

Looks like it came from the company name. Reply goes to the client. Lead + every manager get it.

FIRM → CLIENT

Your Outlook

Connect mailbox once. Send from your real address. App opens the letter for you.

Connect Outlook

Disconnect Outlook

Filter: Client company

Templates · branded or plain

Lead edits own templates · admin any

Welcome email on create

Resend welcome

If mail isn't set up, it just logs — nothing breaks

In-app pings + a diary on the project.

Bell on the top bar

Received tab

Sent tab

Delete a row

Undo for 7 seconds

Clear this tab only

Project activity feed

Green toast when delivered

Same event doesn't stack twice

Beside the checklist — ad-hoc requests.

A calendar of filings builds itself.

People, reporting lines, clients.

Staff directory

Add / edit people

Active or inactive

Lead reports to a manager

Manager's "project leads" list

Client list for the firm

Pick managers when creating a project

Phone number on the profile

Mail directory can include inactive — To starts on Active

Charts and a **black box recorder.**

ANALYTICS

Pictures of the book

Charts exist. Treat them as a preview — some numbers are still sample drawings, not live gospel.

AUDIT

Who did what

Admin: everything. Manager: their companies. Client: their company. Invite and hand-over are logged.

The glue.

Search · Ctrl / ⌘ K

Light / dark theme

Side menu pin

Mobile menu

Back beside the title

Smooth page motion

Empty pictures when a list is blank

Command palette is the only typed search

Logo + “VCFO Suite”

Name moves to the top when menu is slim

Office Wi-Fi: whole team can open it on the LAN

Unlock a field for the client

Lock a field again

Celebrate a finished chapter

Wheel-scroll the tab strip

Arrows on the tab strip

First deliver opens mail · later just a tick

Mark all complete (old shortcut)

Home screens **surface waiters.**

Waiting on manager

Waiting on client

Waiting on a filing

Approvals inbox

Admin home list

Super “needs attention” count

If the approvals page is empty, you’re clear — it still needs a friendlier empty picture.

Not everyone sees everything.

Yes

These moments **already** email someone.

Client submits a step → lead + managers

Client uploads a file → lead + managers

Lead asks manager to approve

Lead pings manager again

Manager accepts → letter to client

Manager sends back / unlocks

Lead delivers to the portal

Board resolution released

Incorporation pack shared

New file request created

Welcome to a new client

Typing a draft does not email

Invite · welcome · hand over.

Send invite link

Open /invite/...

Set yourself up

Land in the right desk

Client invites a teammate

Substitute: swap who is on the project

If you substitute yourself, you are signed out

Welcome mail for brand-new accounts

Resend welcome if they missed it

Both actions write to the audit log

Built enough to pilot. Not everything.

Forgot-password email — later

Weekly compliance digest mail — later

Cloud hosting on AWS — later

“Operations ready” chapter — hidden

Client chat — not a product

Some analytics still use sample drawings

Five practice logins.
