Showing all 7

Open full list

1 · HOVER A PART

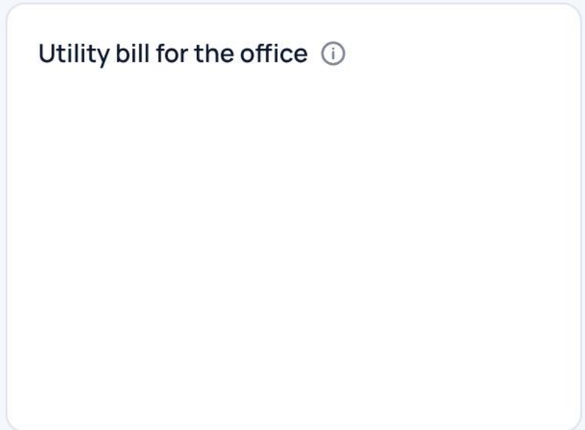

Tooltip: name + count or date. Navy, 6 px corners.

2 · CLICK → DRILL-DOWN POP-UP (CLICKED PART PRE-SELECTED)

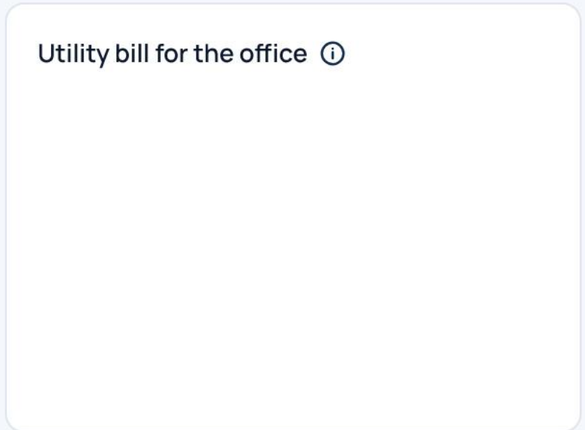

- **One component** for every visual: `v7x_drilldown` with props `title`, `tabs` [[label, count]…], `rows` [[name, date/meta, status, colour, tab]…], `active` (the clicked part), `onclose`.
- **Hover** (or keyboard focus) shows the tooltip; **click / tap / Enter** opens the pop-up. Each part is a real button with an aria-label.
- Pop-up: 600 px, 12 px corners, dimmed backdrop; navy sliding pill (springSnappy) switches between the parts; rows are links to the real page; footer "Showing n of m" + "Open full list". Closes on backdrop, ×, or Esc.
- Wired on the dashboard: greeting ring · current-step badges · timeline bars · compliance-by-area bars · What is next · Alerts · post-incorporation bars · chat phase visual. The compliance donut keeps its own pop-up (same pattern).
- Reduced motion: the pill jumps, no fade.

CLOSED

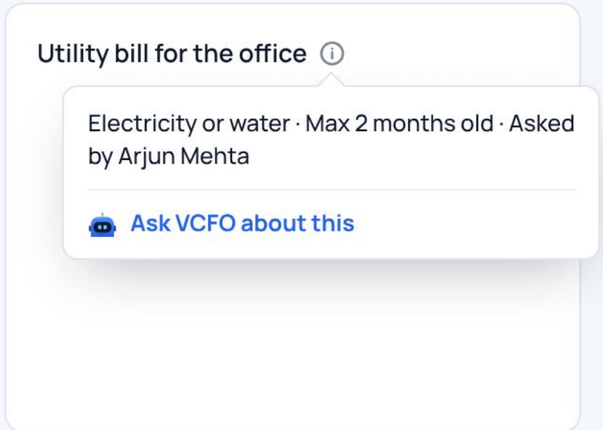

Title + (i). No grey line under it.

HOVER

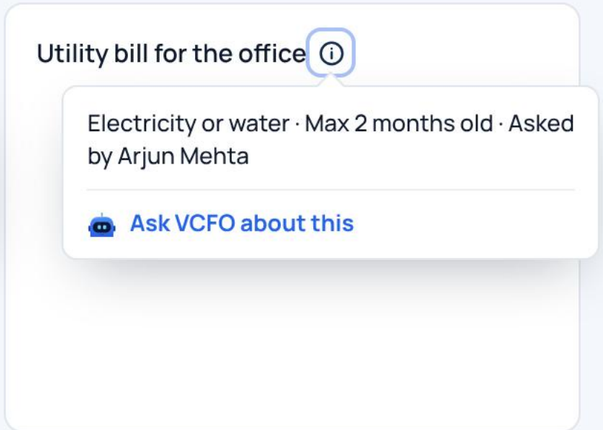

Icon turns navy. Nothing opens on hover.

OPEN

Click opens the pop-over, attached to the icon.

KEYBOARD FOCUS

Focus ring on the icon; Enter opens, Esc closes.

- Trigger: 15 px (i) icon, 18 px hit area inside a 44 px touch target on mobile; muted grey, navy on hover / focus / open.
- Pop-over: attached under the icon with a 10 px arrow; 200–280 px wide; 8 px corners; 1 px border; soft shadow.
- Content: 1–3 short lines, then the meta (for example "Electricity or water · Max 2 months old · Asked by Arjun Mehta").
- Bottom row: 16 px bot avatar + "Ask VCFO about this". Opens the chat with the row's title as the question.
- Opens on click or Enter / Space; closes on outside click, Esc, or Tab out. Only one open at a time. Build: Radix Popover, role="dialog" when it holds the link.
- Reduced motion: no fade or slide.

Ask VCFO

Place: fixed, 24 px from the right edge, bottom = the browser window's bottom edge. Avatar box 108 px, so the head is about 80 px wide; about 100 px shows above the edge.

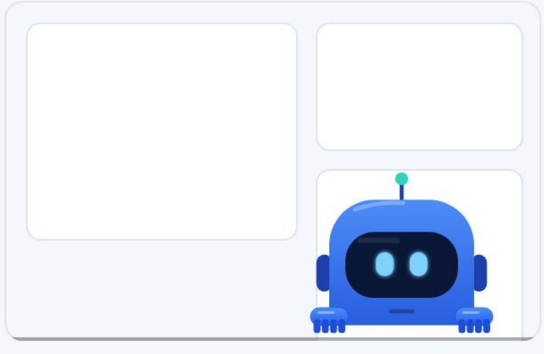

Click: the robot opens the floating chat window (400 × 640) right above it. While the chat is open the robot **stays risen**: it is the window's anchor and shows thinking / answered / can't-answer moods while you chat.

Covering content: while the client scrolls, the robot sinks to a 50 px peek (antenna and top of the head) and rises 600 ms after scrolling stops. Pages get 96 px bottom padding so the last row can scroll clear of it.

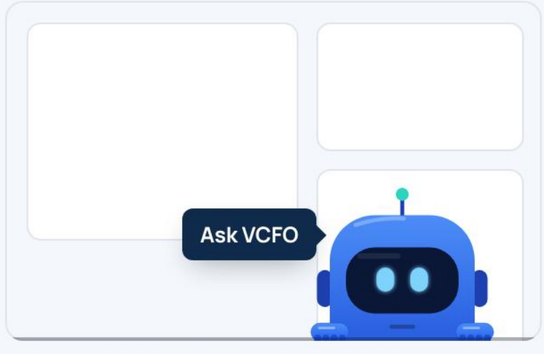

STORYBOARD

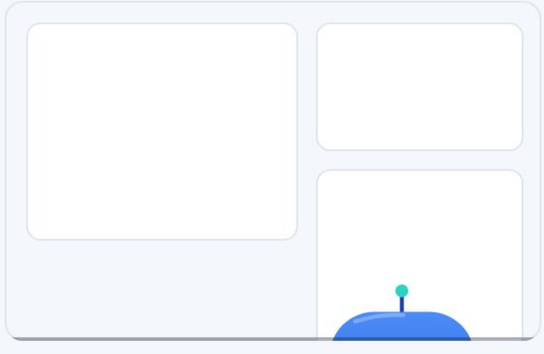

1 · Hidden
0 ms. Fully below the screen edge (outline shows where it will rise). Starts 600 ms after the page loads, so it never competes with the first paint.

2 · Springs up
0 → 400 ms. Rises with a spring (stiffness 420, damping 32) and overshoots about 8 px.

3 · Settles, looks around
400 → 700 ms settles; then blinks every 4.5 s and glances left and right every 8 s. The "Ask VCFO" bubble fades in at 700 ms.

4 · Sinks back
250 ms ease-in when a pop-up or modal opens, or while the client scrolls (down to a peek: antenna and top of the head, about 50 px). Rises again when that ends.

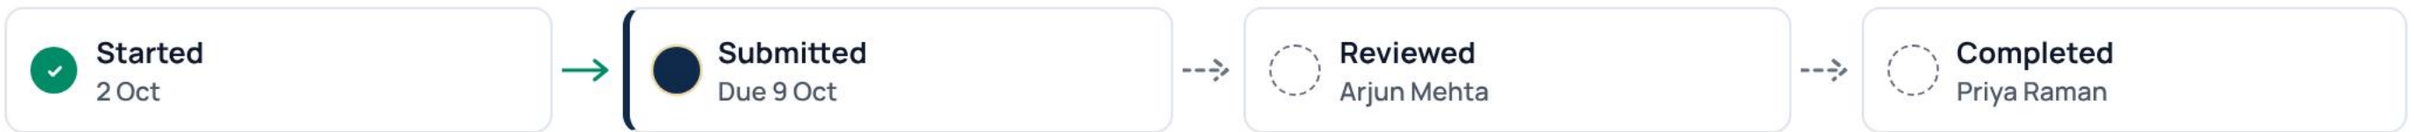

Reduced motion: no rise, sink or glance. The robot is shown already risen, the bubble is visible, and the eyes do not blink. Moods: idle blink here; thinking, answered and can't-answer reuse the Bot avatar component while the chat is open.

A Connected chips Picked

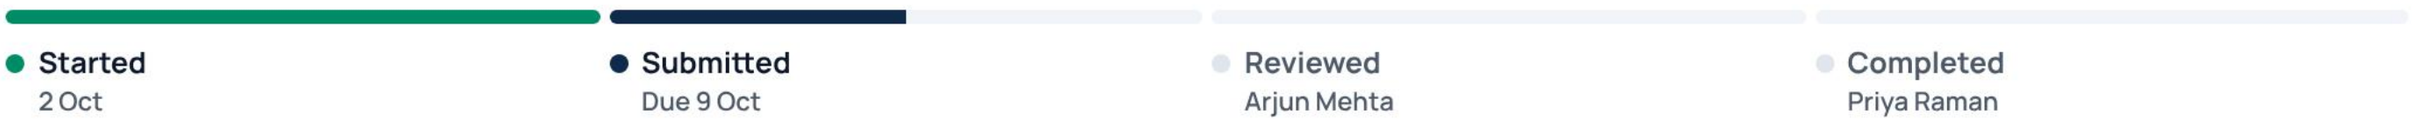

Done = green with a tick, current = navy with a gold pulse, next = dashed. One short line per stage; the rest is in (i). Reads in one glance, fits the 760 px pop-up.

B Run graph

Small cards joined by arrows (GitHub Actions / Linear principle). Clear, but four cards feel heavy inside a pop-up that already has sections.

C Progress rail

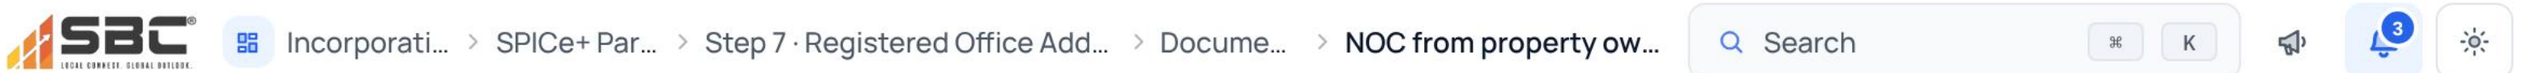

One segmented bar with labels under it (Vercel / Stripe principle). Very calm, but the current stage stands out less.

SHORT TRAIL

LONG TRAIL: IT TRUNCATES, THE RIGHT GROUP NEVER MOVES
