THE PROBLEM

Three places where the work breaks

Founders, CFOs and foreign parents tell us the same story. Effort is never the issue; the work is spread across tools that do not talk to each other.

Incorporation on email and Excel

The status sits in someone's inbox, so the client never knows where things stand without calling.

Same data typed ten times

Every director's details are retyped into each MCA document. One typo means a resubmission.

Compliance in a diary after the COI

Once the certificate arrives, the calendar moves to another tool or a diary, and due dates slip.

And then: licences and DSCs lapse silently, tax notices are answered late, board papers scatter across inboxes and collections are chased by hand.

THE COST OF GETTING IT WRONG

Small slips, real costs

Each of these is a real, published cost. SBC will fill in the figures from the statute and its own practice before this deck is used.

[—]

Late fee per day

for a delayed ROC filing

[SBC to confirm: late fee per day for ROC filings]

[—]

Months lost

when incorporation runs on email

[SBC to confirm: typical months lost]

[—]

Penalty example

from one missed GST, TDS or ROC date

[SBC to confirm: penalty example]

Sources: [SBC to confirm: cite the Companies Act 2013, CGST Act or Income-tax Act section behind each figure].

VCFO SUITE

The whole tool on one slide

Four jobs, one company record. Everything a company needs from the first questionnaire to every annual filing.

Set up the company

U1 U2

The 34-step SPICe+ checklist, MCA drafts generated per director, GST REG-01 and every other registration.

Keep it compliant

U5 U6 U9

A yearly calendar for GST, TDS, PF, ESI, ROC and FEMA; a filings register; automation; Ask VCFO.

Run the board and the money

U7 U8

Board meetings from notice to signed resolution; receivables with bank matching; payroll and labour registers.

See and trust everything

U3 U4

Client portal, firm cockpit, manager approval gate, audit log, encrypted vault and two-step sign-in.

PLATFORM CAPABILITIES

Six modules on one record

Each module reads and writes the same company record, so the data entered on day one is still the data used at every filing.

Incorporation engine

34 SPICe+ steps in MCA order. Steps open in sequence; red marks show missing fields; auto-save.

Document generator

MOA, AOA, DIR-2, DIR-8, declarations, letters and board resolution, per director, in one ZIP.

Compliance calendar

GST, TDS, PF, ESI, ROC/MCA and FEMA events, reminders, filings register with proof.

Board meetings

224-item agenda library, Word notice, Teams link, Yes/No replies, quorum, MoM signing.

Receivables

COMING SOON

Reminders, partner logins, camt bank matching, nine currencies, ageing and cash forecast.

Payroll and labour registers

COMING SOON

Salary updates, payroll summary and statutory registers per establishment.

WHAT MAKES IT DIFFERENT

Ten things only VCFO Suite does

The first four, in white, are the reason most clients choose us. The other six are why they stay.

U1

Incorporation to compliance

One app, same record, no re-entry.

U2

Documents write themselves

MCA drafts per director, one ZIP.

U3

Manager approval gate

Nothing reaches the client unchecked.

U4

The client is inside the app

Own portal, own phone.

U5 SOON

The app chases for you

Request lists, expiry, notices, health.

U6

Ask VCFO knows the actual status

Answers from the client's files.

U7

Board meetings end to end

Notice, Teams, Yes/No, minutes.

U8 SOON

Receivables with forex

Bank matching; cash for the CFO.

U9

India-native, not adapted

SPICe+, REG-01, GST to FEMA.

U10

Platform + CA/CMA team

One accountable engagement.

HOW ONE STEP MOVES

Every step passes a manager first

This is the approval gate (U3). It applies to checklist steps, documents, board notices and filings alike.

1

Lead or client fills

Fields save as they type.

2

Lead submits

Missing fields are checked first.

3

Manager reviews

Approves or sends it back.

4

Client sees approved work

Drafts stay hidden until then.

5

Everyone is told

Email, in-app bell, WhatsApp.

Every action in this loop is written to the append-only audit log. Email is the system of record; WhatsApp is an extra nudge that never blocks it.

AUTOMATION COMING SOON

The app works between meetings

It chases files, watches expiries and notices, scores client health, and answers questions from the live record (U5 and U6).

Request lists

Email, then WhatsApp, then a call task.

Expiry alerts

T-60 · T-30 · T-7

Licences, DSCs, registrations; renewal task opens itself.

Notice escalations

T-7 · T-2

Tax notices tracked to the reply date.

Client health

Nightly score; SLA ladder lead → manager → partner.

Ask VCFO

U6

"Where is my incorporation?"

Answers from the live checklist, explains due dates and rules with citations, and links to the right page.

50 files, folders or ZIPs dropped at once, sorted into one review card per client. A person always approves.

COMING SOON

BUILT FOR INDIAN COMPLIANCE

Indian law is the starting point, not an add-on

SPICe+, REG-01 and the statutory calendar are part of the design (U9). Nothing is adapted from a foreign template.

Companies Act 2013 / SPICe+

34-step checklist, MCA drafts, board resolutions, ROC filings.

GST

Registration laid out like REG-01; returns in the yearly calendar.

TDS

Deposits and returns tracked with reminders and proof.

PF and ESI

Contributions and returns on the calendar for covered establishments.

ROC and FEMA events

Annual and event-based filings, including foreign investment reporting.

Labour laws

COMING SOON

Statutory registers generated per establishment.

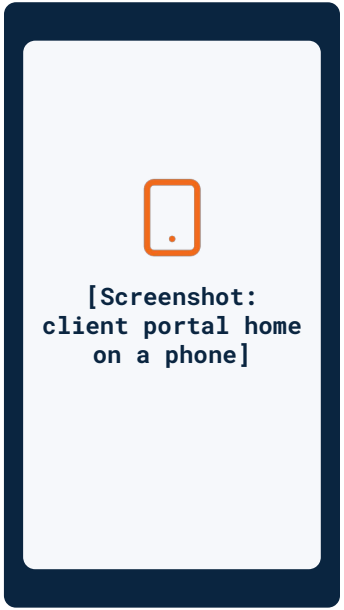

Five roles | **Manager approval gate** | **Audit log** | **Encrypted vault** | **Two-step sign-in** | **AWS Mumbai**

ONE APP, FIVE ROLES

One record, and each role sees its part

Role scoping is applied to every query. A client never sees another client's data (U3, U4).

ROLE	MAIN JOB	WHAT THEY SEE
Super admin	Runs the firm: users, settings, every client	Everything, firm-wide
Admin	Runs day-to-day work across clients	All clients and reports
Manager	Reviews and approves the team's work	Team clients, approvals inbox
Project lead	Fills, drafts and submits the work	Assigned clients, My day
Client	Answers, signs and follows progress	Own company, approved work only

Journey map · next step · due dates · documents · requests · messages · vault

PROOF IN THE PLATFORM

Specific, countable and ready to show

34
SPICe+ steps

224
agenda items in the library

9 SOON
invoice currencies

AWS
Mumbai, ap-south-1

Per-director MCA drafts
One set per director, one ZIP.

Manager approval gate
Drafts hidden until approved.

Board meeting loop
Notice to signed resolution.

Bank auto-matching SOON
camt import, TDS tolerance.

Ask VCFO with citations
Answers from the live record.

Append-only audit log
Every action, who and when.

Every claim here is built and can be shown on a working company. Items marked soon are rolling out now.

WHY SBC + VCFO SUITE

One platform, one team, one outcome

You do not buy software and get left alone with it. SBC's team does the work in the app with you (U10).

CA/CMA-led

Built and run by a CA and CMA-led firm that files for clients every month.

India-native

Designed around SPICe+, REG-01 and the Indian statutory calendar.

Software + services in one engagement

One team, one contract, one point of accountability for the result.

Secure, multi-role platform

Role scoping, audit log, encrypted vault, two-step sign-in, AWS Mumbai.

GET STARTED

Three ways to begin

Each one is a conversation with SBC’s team, with the app open on the table.

Schedule a demo

See the checklist, document pack, approval gate and client portal on a working company.

Start with one company

Run one incorporation or one subsidiary end to end, and judge it on the result.

Book a compliance health check

We load an existing company’s obligations and show what is due, late or missing.
