GL 3 · Global (cross-cutting)

Changes that apply to all pages and all roles. · 9 items

GL-01 Notification "Open" button must go to the exact step

Bug · P1 · Effort M · L M A C

NOW

The notification pop-up has the buttons "Open" and "Got it". "Open" does not always open the page or step that the notification is about.

REQUIRED CHANGE

1. Record the target link (client, project and step) with each notification when the app makes it.
2. Make "Open" open the exact step page of that client and project.
3. Move the page to the related card and highlight that card for 2 seconds.
4. Use the same target link in the notification list, the email and the WhatsApp message.
5. If the user cannot open the step, open the nearest permitted page and show the reason.
6. Mark the notification as read when the user clicks "Open".

ACCEPTANCE CHECKS

- [ ] For each notification type, "Open" opens the step that the notification names.
- [ ] The related card is on the screen and is highlighted after the page opens.
- [ ] The result is the same for the Lead, Manager, Admin and Client.
- [ ] An automated test checks the target link of each notification type.

WHERE Notification pop-up and notification list START IN CODE `src/components/notifications/NotificationLivePopup.tsx` `src/components/notifications/NotificationItem.tsx` `src/lib/notifications/notification-dismiss.ts`

NOTE Do this item together with NV-04. Proposal: old notifications without a target link open the project overview.

GL-02 Toasts pile up and block work

UI change · P2 · Effort S · L M A C

NOW

Each toast stays on the screen for 5 seconds or more. Many toasts pile up in the corner and cover buttons that the user needs.

REQUIRED CHANGE

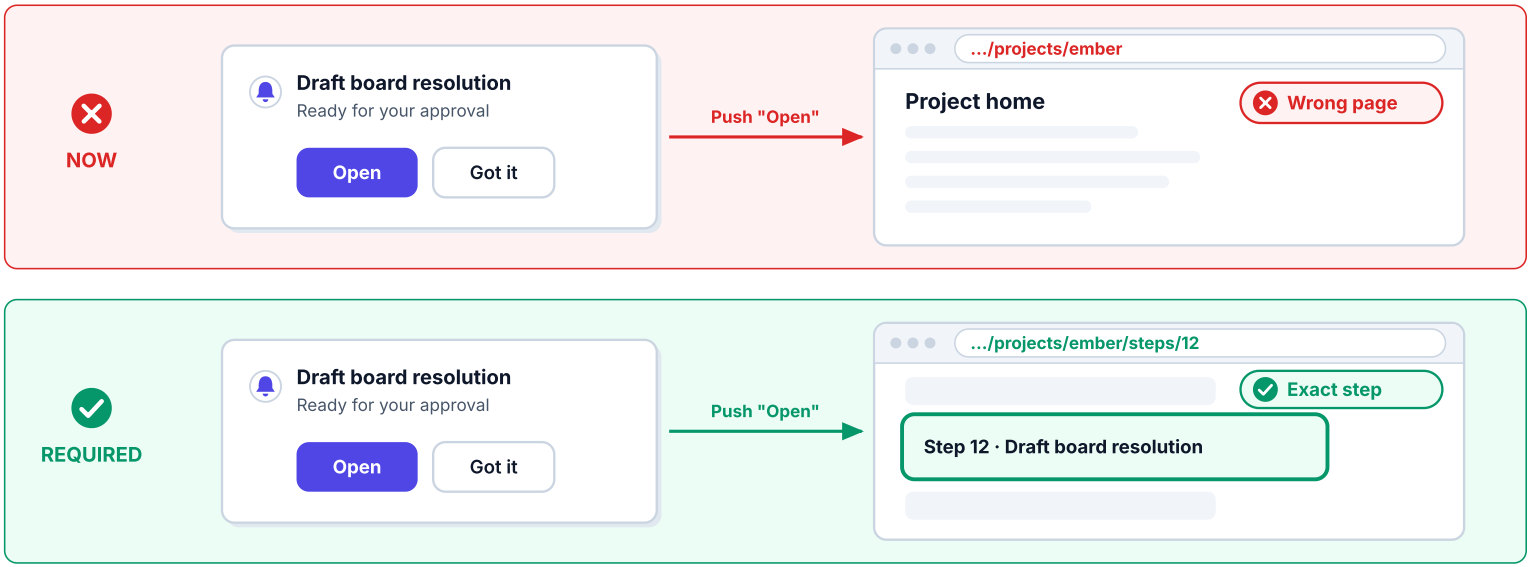

1. Set the toast life to 3 seconds.
2. Add a close (X) button to each toast.
3. Show a maximum of 3 toasts at one time.
4. Put the newest toast on top and remove the oldest toast first.
5. Stop the timer while the pointer is on a toast.
6. Use one shared toast component for all toasts in the app.

ACCEPTANCE CHECKS

- [ ] A toast goes away 3 seconds after it comes into view.
- [ ] A click on the X closes that toast immediately.
- [ ] When 5 actions run quickly, no more than 3 toasts are visible.
- [ ] The toast stays while the pointer is on it.

WHERE Toasts, all screens START IN CODE `src/components/ui/hot-toast.tsx` `app/providers.tsx`

NOTE Proposal: 3 seconds, maximum 3 toasts. Proposal: toasts with an "Undo" button and error toasts stay for 6 seconds.

For GL-01 **Figure 1** · The "Open" button must open the exact step.

GL-03 Active tab must be clearly highlighted

UI change · P2 · Effort S · L M A C

NOW

The active tab and the other tabs look almost the same. The user cannot quickly see which tab is open.

REQUIRED CHANGE

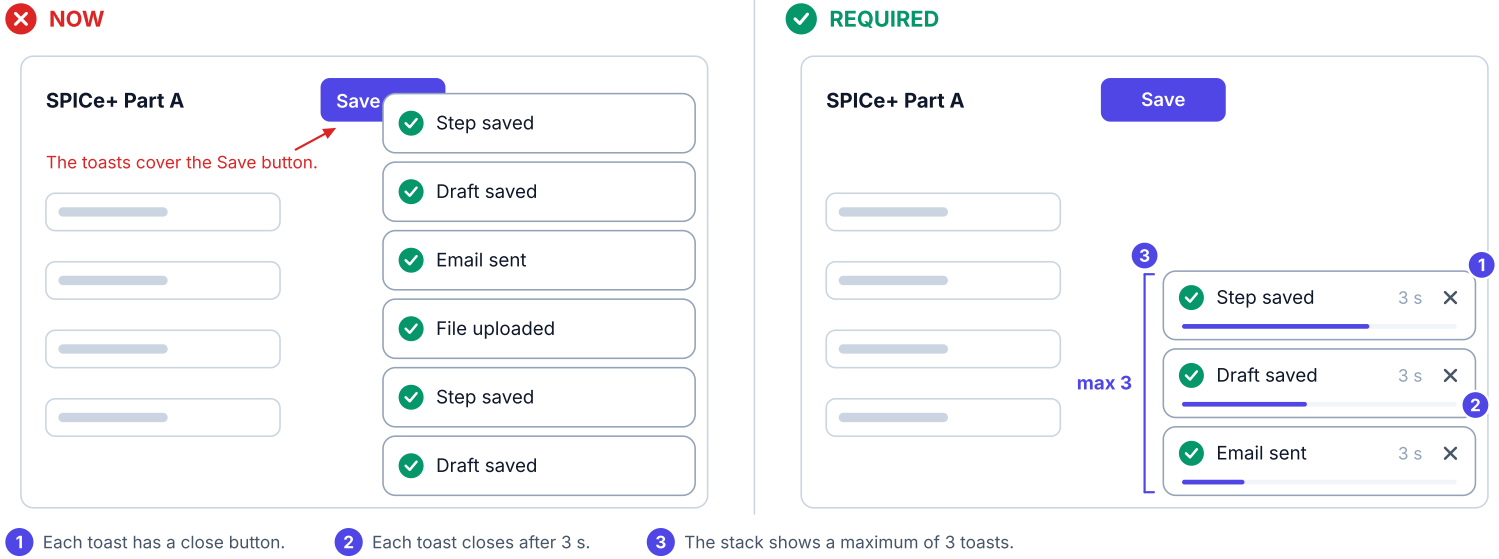

1. Show the active tab with a thick brand-colour underline, brand-colour text and bold text.
2. Show each inactive tab with muted text and no underline.
3. Set aria-selected="true" on the active tab only.
4. Do not use colour only; the underline and bold text must also show the active tab.
5. Use the one shared tab component for every tab bar in the app.
6. Make sure the active tab passes the contrast check in light theme and dark theme.

ACCEPTANCE CHECKS

- [ ] On the Client details page, the open tab has the underline and bold text.
- [ ] Only one tab in each tab bar has the active style.
- [ ] A screen reader reads the active tab as selected.
- [ ] Every tab bar in the app uses the same active style.

WHERE All tab bars, example: Client details **START IN CODE** `src/components/ui/spectrum-tabs.tsx`

NOTE Proposal: 3 px brand underline. A filled brand background is the alternative. The shared component is spectrum-tabs.

For GL-02 **Figure 2** · Toasts: a close button, a short life and a limit of three.

GL-04 Replace "Why this?" text with an (i) help icon and pop-up

UI change · P3 · Effort M · L M A C

NOW

Forms show the help text "Why this?" as large text near the field. The text uses space and makes the form hard to read.

REQUIRED CHANGE

1. Remove the visible "Why this?" text from every form.
2. Add a small (i) icon button immediately after the field label.
3. Open a small pop-up with the help text when the pointer is on the icon.
4. Open the same pop-up on keyboard focus and on tap.
5. Close the pop-up when the pointer leaves, on Escape and on a tap outside.
6. Keep the current help text; change only how the app shows it.

ACCEPTANCE CHECKS

- [ ] No screen shows the "Why this?" text outside a pop-up.
- [ ] Each field that had help text has an (i) icon after its label.
- [ ] The pop-up opens with the mouse, the keyboard and a touch screen.
- [ ] A screen reader reads the help text of the icon.

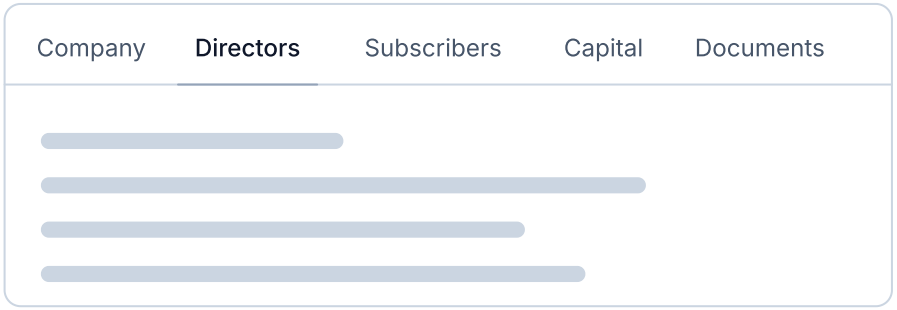

WHERE All forms with "Why this?" text

START IN CODE `src/components/ask/FieldHelpButton.tsx` `src/data/ask/field-help.ts` `src/views/incorporation/milestone-form/editable-field.tsx`

NOTE Proposal: use one shared help-icon component. The current client form button "Why do we ask this?" is the start point.

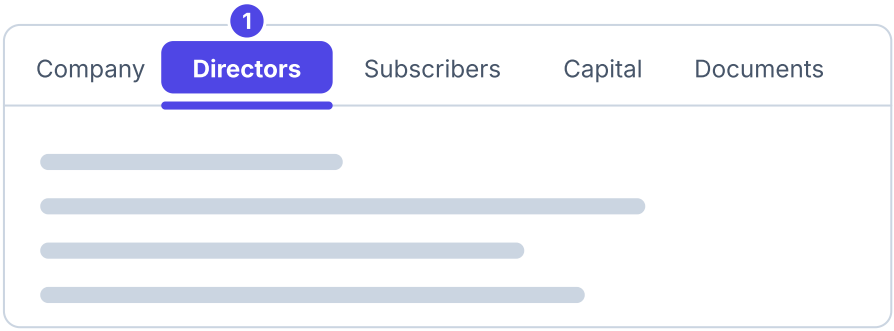

GL-03

NOW

The active tab looks almost the same as the other tabs.

REQUIRED

1 The active tab has a filled background, bold text and a thick underline.

For GL-03 **Figure 3** · The active tab must be easy to see.

GL-05 Right side panel (progress rail) must collapse and expand

Feature · P2 · Effort M · L M A C

NOW

The side panel with the step progress is always open on the right. The user cannot move it away to get more space for the form.

REQUIRED CHANGE

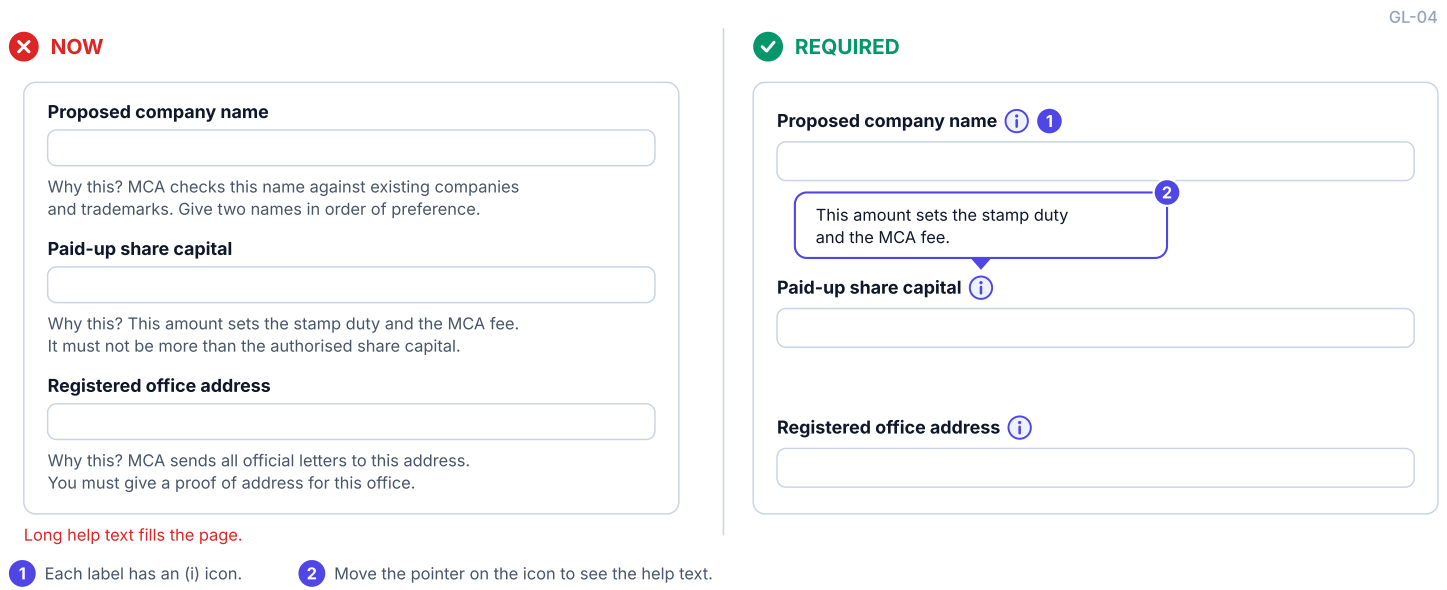

1. Add a handle on the left edge of the side panel.
2. Close the side panel when the user pushes the handle; open it on the next push.
3. Keep the handle visible at the right edge of the screen when the side panel is closed.
4. Give the free width to the form when the side panel is closed.
5. Open the side panel by default; then keep the last state for each user.
6. Do this on the SPICe+ Part A page, the SPICe+ Part B page and every step page.

ACCEPTANCE CHECKS

- [ ] A new user sees the side panel open.
- [ ] One push on the handle closes the side panel; the next push opens it.
- [ ] The state stays the same after a page change and after a new sign-in.
- [ ] The handle works for the Lead, Manager, Admin and Client, with mouse and keyboard.

WHERE SPICe+ Part A, Part B, step pages **START IN CODE** `src/components/incorporation/Phase1StepPanelRoutePanels.tsx` `src/components/intern/LeadSideRail.tsx`

NOTE Proposal: closed state shows a 24 px strip with the handle. Record the state on the user profile, not only in the browser.

For GL-04 **Figure 4** · An (i) icon and a pop-up replace the "Why this?" text.

GL-06 "Export to Excel" buttons where needed

Feature · P2 · Effort L · L M A C

NOW

Most lists and tables have no export. The user must copy the data by hand to use it in Excel.

REQUIRED CHANGE

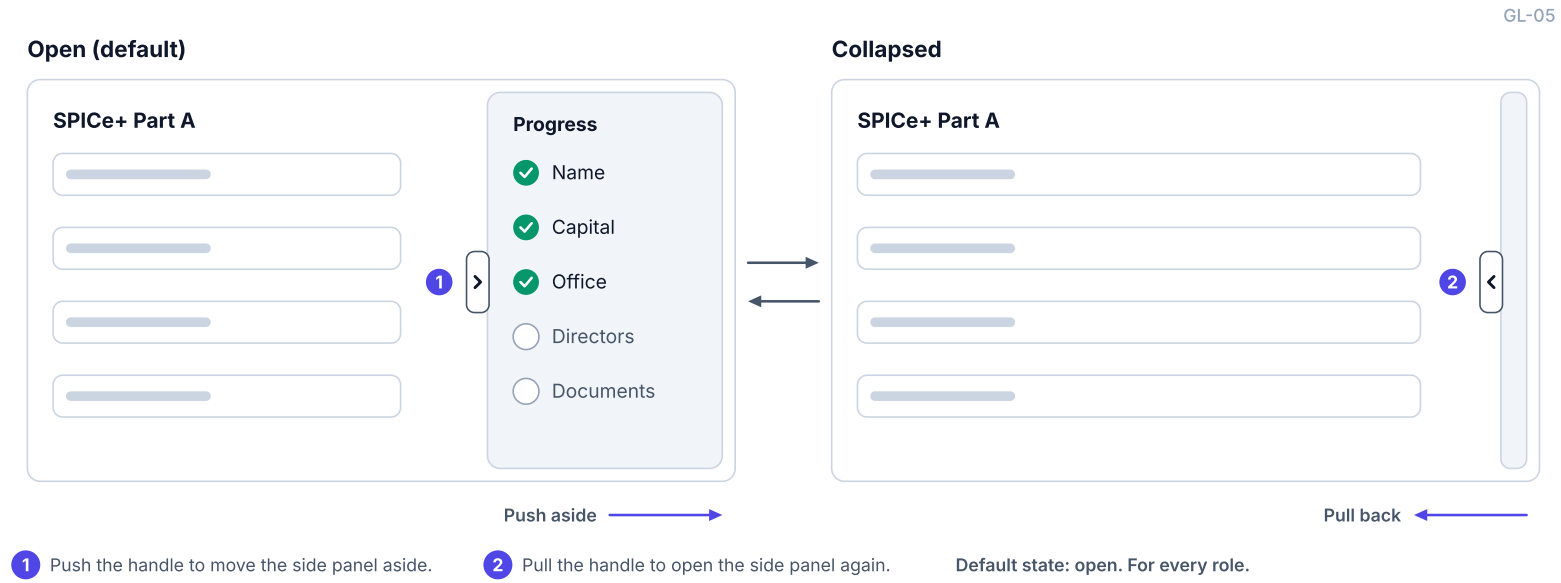

1. Add an "Export to Excel" button at the top right of each list in the notes.
2. Put the rows that match the current filters and sort order into the file.
3. Put all matching rows into the file, not only the rows on the screen.
4. Put only the data that the role of the user can see into the file.
5. Make the file in a background job and tell the user with a toast when it is ready.
6. Use the standard file name from GL-08.

ACCEPTANCE CHECKS

- [ ] Each list in the notes has the button in the same position.
- [ ] The .xlsx file opens in Excel and has the same columns and rows as the filtered list.
- [ ] A Lead export does not contain clients that the Lead cannot see.
- [ ] The screen stays usable while the app makes the file.

WHERE List and table screens **START IN CODE** `src/lib/receivables/statement-xlsx.ts` `src/jobs/`

NOTE Proposal for lists: Projects, Clients, Directors grid, Compliance obligations, Compliance calendar, Approvals, Audit log, Request lists. Team to confirm.

For GL-05 **Figure 5** · The side panel can be pushed aside and pulled back.

GL-07 Manual "Send email" button with editable pre-filled pop-up (no automatic emails)

Feature · P1 · Effort L · L M A C

NOW

Some actions on a card send an email to the Client automatically. The user cannot read or change the email before it goes.

REQUIRED CHANGE

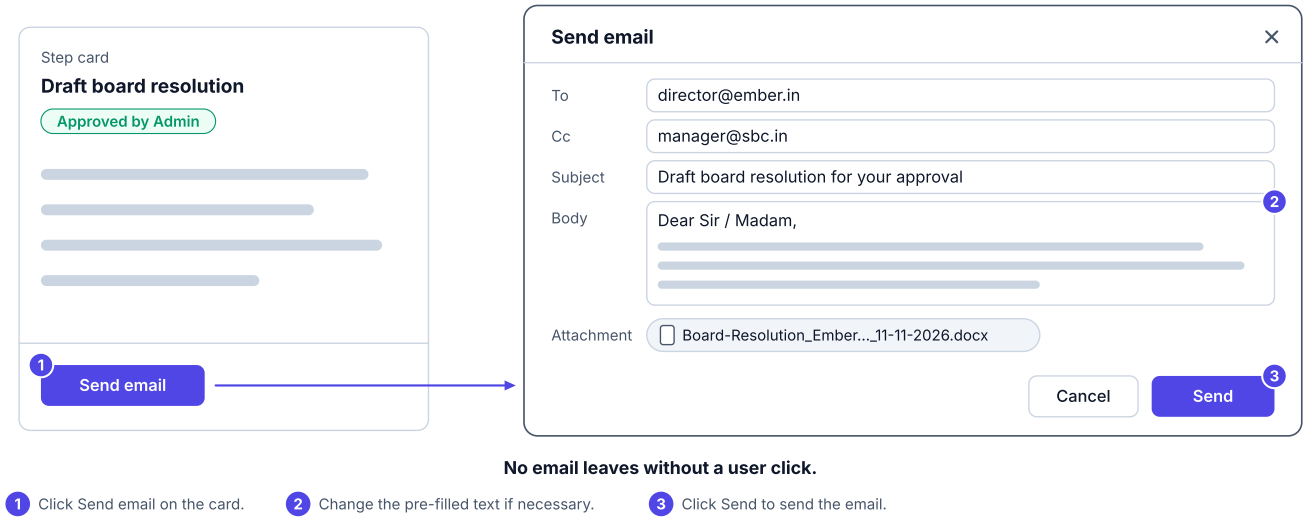

1. Stop every automatic email that a card action starts.
2. Add a "Send email" button at the bottom of each card that sends an email.
3. Open a pop-up with To, Cc, Subject, Body and attachments, all filled from the card data.
4. Let the user change every field and add or remove attachments.
5. Send the email only when the user clicks "Send"; "Cancel" closes the pop-up and sends nothing.
6. Record the sender, the time, the recipients and the subject on the card and in the audit log.

ACCEPTANCE CHECKS

- [ ] No email leaves a card without a click on "Send".
- [ ] The pop-up opens with the correct recipient, subject, body and attachments for that card.
- [ ] The Client gets the changed text, not the template text.
- [ ] The card shows who sent the email and when.

WHERE Every card that sends an email **START IN CODE** `src/lib/email/send-email.ts` `src/lib/actions/requests/send-list.ts` `src/lib/board-meetings/send.ts`

NOTE Open question: do scheduled reminders and digests stay automatic? Proposal: yes. Proposal: send the WhatsApp message only after the user sends the email.

For GL-07 **Figure 6** · A person reads, changes and sends each email.

GL-08 Standard file name for every downloaded document

Feature · P2 · Effort M · L M A C

NOW

Download names follow different patterns, for example moa.docx. Most names do not contain the client name or the date.

REQUIRED CHANGE

1. Use the pattern <DocumentName>_<ClientName>_<DD-MM-YYYY>.<ext> for every download.
2. Change each space in the document name and the client name to a hyphen.
3. Remove the characters that Windows does not permit in a file name.
4. Use the date of the download in Indian Standard Time.
5. Use the pattern for docx, pdf, xlsx and zip files, and for each file in a ZIP.
6. Make the name in one shared function that every download uses.

ACCEPTANCE CHECKS

- [ ] A board resolution download has the name Board-Resolution_Ember-Technologies-Private-Limited_11-11-2026.docx.
- [ ] Each file type (docx, pdf, xlsx, zip) follows the pattern.
- [ ] The name opens without an error on Windows and macOS.
- [ ] An automated test checks the shared function with 5 client names.

WHERE Every download button and ZIP file **START IN CODE** `app/api/engagements/[id]/board-resolution/download/route.ts` `app/api/engagements/[id]/incorporation-docs/download/route.ts`

NOTE Proposal: for a director document, add the director name to the document name, for example DIR-2-Asha-Rao. The date format follows the owner's order: day, month, year.

GL-09 Correct letter casing in generated documents

Bug · P1 · Effort S · L M A C

NOW

For the client "Ember", the generated document shows the company name with a small first letter. This is wrong information in a legal document.

REQUIRED CHANGE

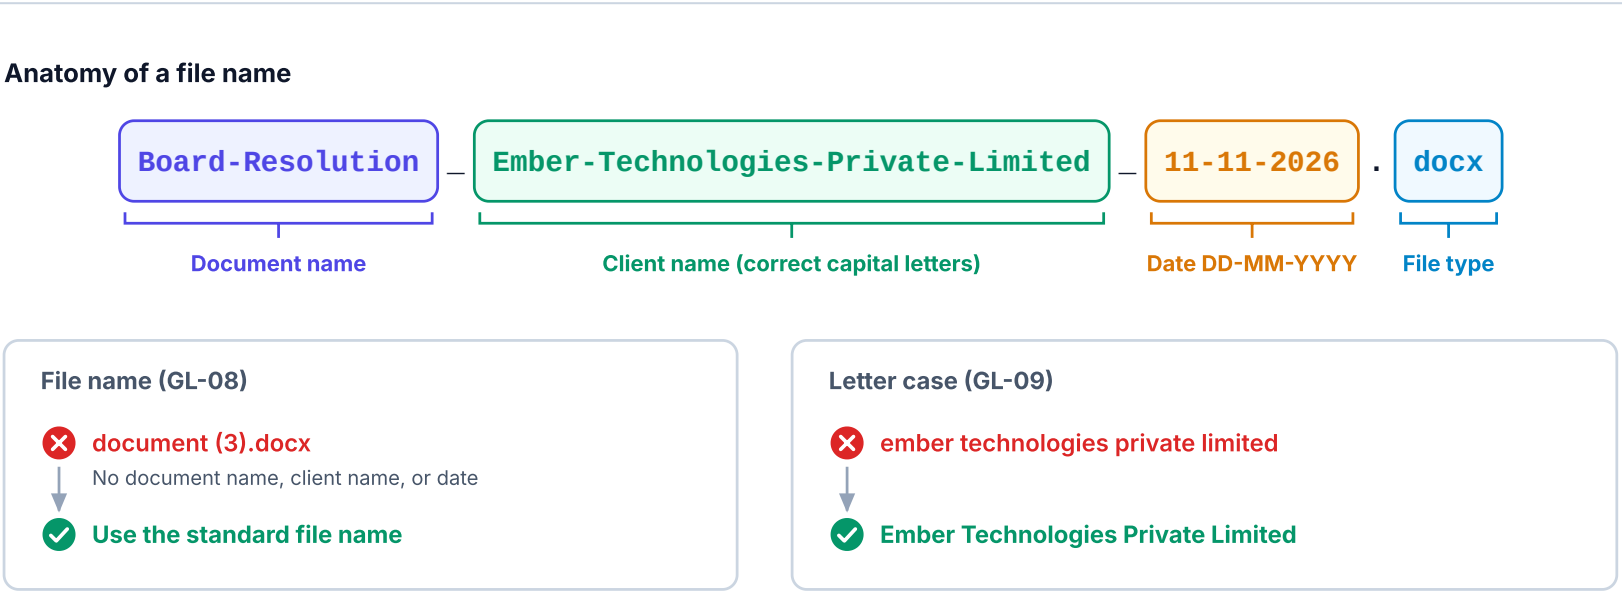

1. Start each word of a company name and a person name with a capital letter.
2. Do this in every generated document, also when the user typed the name in lower case.
3. Always write LLP and OPC in capitals; keep each word that the user typed in all capitals.
4. Use one shared function for the name casing in all document generators.
5. Show the corrected name in the document preview before the download.
6. Add an automated test with the typed name "ember technologies private limited".

ACCEPTANCE CHECKS

- [ ] The typed name "ember technologies private limited" comes out as "Ember Technologies Private Limited".
- [ ] "abc (india) llp" comes out as "Abc (India) LLP".
- [ ] No generated document shows a company name or person name that starts with a small letter.
- [ ] The automated test passes for each document template.

WHERE All generated documents START IN CODE `src/lib/board-resolution/board-resolution.ts` `src/lib/incorporation-docs/shared.ts`

NOTE Proposal: also correct the name when the user saves it, so screens and documents agree. A casing helper is in src/lib/incorporation-docs/shared.ts.

For GL-08 · GL-09 **Figure 7** · Parts of the standard file name, and correct capital letters.

NV 4 · Navigation

Sidebar, breadcrumb and redirect corrections. · 4 items

NV-01 Incorporation menu in sidebar must have a dropdown

Feature · P2 · Effort M · L M A C

NOW

The sidebar item "Compliances" opens a dropdown with Obligations, Calendar and Filings. The item "Incorporation" is one link with no sub-items.

REQUIRED CHANGE

1. Add a dropdown to the "Incorporation" item in the sidebar.
2. Add the sub-items Overview, SPICe+ Part A, SPICe+ Part B, Board resolutions and Documents.
3. Use the same dropdown component and style as "Compliances".
4. Highlight the sub-item of the open page and keep the dropdown open on that page.
5. Show only the sub-items that the role of the user can open.
6. Keep the count badge on the Incorporation item.

ACCEPTANCE CHECKS

- [ ] The Incorporation item opens and closes its dropdown with a click and with the keyboard.
- [ ] Each sub-item opens the correct page for the role.
- [ ] The open page has its sub-item highlighted.
- [ ] The Incorporation and Compliances dropdowns look and work the same.

WHERE Sidebar, Incorporation item START IN CODE `src/components/shell/sidebar-items.ts` `src/components/shell/compliance-nav.ts`

NOTE Proposal: the 5 sub-items are a first list; team to confirm. When no client is selected, a sub-item opens the client list first.

NV-02 Sidebar "Incorporation" link must return to the Incorporation main page

Bug · P1 · Effort S · L M A C

NOW

The user opens Incorporation, then SPICe+, then clicks "Incorporation" in the sidebar. The app does not open the Incorporation main page.

REQUIRED CHANGE

1. Make the sidebar item "Incorporation" always open the Incorporation main page of the role.
2. Do this from every page below Incorporation, for example SPICe+ Part A and SPICe+ Part B.
3. Keep the Incorporation item highlighted while a page below Incorporation is open.
4. Do not keep the old client or step in the address after the click.

ACCEPTANCE CHECKS

- [ ] From the SPICe+ Part A page, one click on "Incorporation" opens the Incorporation main page.
- [ ] The address in the browser is the Incorporation main page address.
- [ ] The result is the same for the Lead, Manager and Admin.
- [ ] An end-to-end test does these steps and passes.

WHERE Sidebar, from SPICe+ pages START IN CODE `src/components/shell/sidebar-items.ts`

NOTE After NV-01, the Overview sub-item must open the same main page. The Client portal has its own menu; check it in NV-04.

NV-03 Breadcrumb segments must be links (example: "SPICe+ A")

Bug · P2 · Effort S · L M A C

NOW

Some breadcrumb segments are plain text. For example, the user cannot click "SPICe+ A" to go back to the SPICe+ Part A page.

REQUIRED CHANGE

1. Make each breadcrumb segment a link, but not the last segment.
2. Open the page that the segment names, for the same client and project.
3. Show the last segment as plain text with aria-current="page".
4. Underline a segment when the pointer is on it or when it has keyboard focus.
5. Do not show a segment that has no page; do not show a dead link.

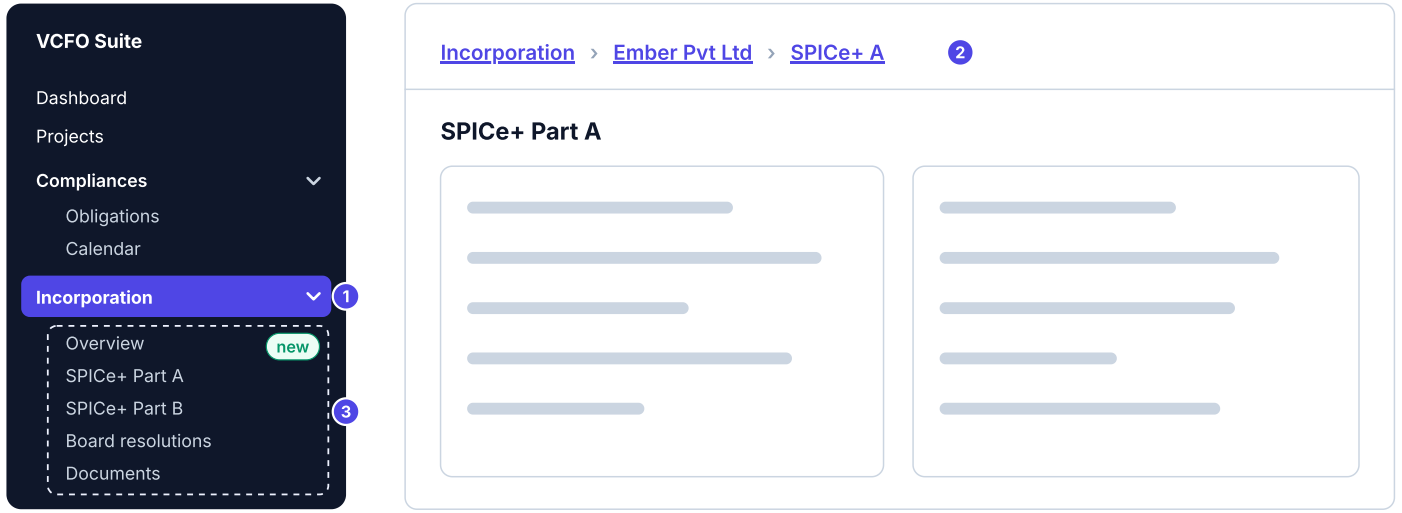

ACCEPTANCE CHECKS

- [ ] On a SPICe+ Part A step page, a click on "SPICe+ A" opens the SPICe+ Part A page.
- [ ] Each segment but the last opens a page without an error.
- [ ] The user can go through the segments with the Tab key and open one with Enter.
- [ ] The checks pass for each of the 5 roles.

WHERE Top bar breadcrumb, all pages START IN CODE `src/components/shell/shell-crumbs.ts` `src/components/shell/TopBar.tsx`

NOTE The breadcrumb comes from shell-crumbs in the top bar. Give each segment a link there, not on each page.

NV-01, NV-02, NV-03

1 The sidebar link always opens the Incorporation main page. 2 Each breadcrumb segment is a link. 3 New dropdown, the same as Compliances.

For NV-01 · NV-02 · NV-03 **Figure 8** · Incorporation dropdown, sidebar link and breadcrumb links.

NV-04 Audit and fix all wrong redirects in the app

Bug · P1 · Effort L · L M A C

NOW

Some links open the wrong page or keep the user on the same page. NV-02 and NV-03 are two examples; the owner saw more.

REQUIRED CHANGE

1. Sign in as each of the 5 roles: super_admin, Admin, Manager, Lead and Client.
2. Open every sidebar link, breadcrumb segment, card link, button link and notification link.
3. Record the role, start page, link, expected page, actual page and result in a table.
4. Correct each link that opens the wrong page, an error page or a page of a different role.
5. Add an automated end-to-end test that opens each link for each role.
6. Give the table to the owner with the release.

ACCEPTANCE CHECKS

- [ ] The table has one row for each link and each role.
- [ ] Each row has the result Pass after the corrections.
- [ ] The end-to-end link test passes in the check before each release.
- [ ] No link opens a 404 page, a blank page or a page of a different role.

WHERE All navigation, all 5 roles START IN CODE `src/components/shell/sidebar-items.ts` `src/components/shell/shell-crumbs.ts` `e2e/`

NOTE Proposal: add the link test to the current page smoke test (npm run e2e:smoke). GL-01, NV-02 and NV-03 are part of this audit.

PR 5 · Projects

Project creation and project download. · 2 items

PR-01 BUG: Project name field loses focus after the first letter

Bug · P1 · Effort S · L M A C

NOW

The cursor leaves the project name field after the first letter. The user must click Edit again to continue.

REQUIRED CHANGE

1. Keep the cursor in the project name field while the user types.
2. Remove the focus only when the user leaves the field or pushes Enter.
3. Save the name when the user leaves the field or pushes Enter.
4. Make the same correction in the rename field on the project page.
5. Add an automated test that types a 40-character name without a second click.

ACCEPTANCE CHECKS

- [ ] A user types a 40-character name without a second click.
- [ ] The cursor stays in the field after each key press.
- [ ] The saved project name is the same as the typed text.

WHERE New project form, project name field START IN CODE `src/views/admin/ProjectsNew.tsx` `src/views/admin/ProjectEdit.tsx`

NOTE Hint: it is possible that the input field mounts again on each key press. Find the cause before the correction.

PR-02 Download the full project as a ZIP file

Feature · P2 · Effort L · L M A C

NOW

The user can download project documents one at a time only. The app has no download for the full project.

REQUIRED CHANGE

1. Add a "Download project (ZIP)" button to the project page header, next to the project name.
2. Put the questionnaire answers (xlsx), the director details and the subscriber details in the ZIP file.
3. Also put in all generated documents, all uploaded documents, the board resolutions (draft and signed) and the audit log.
4. Make the ZIP file in a background job.
5. Send the user a notification with the download link when the ZIP file is ready.
6. Give the ZIP file a name that follows GL-08.

ACCEPTANCE CHECKS

- [ ] The button is in the project page header for Lead, Manager and Admin.
- [ ] The user can continue to work while the app makes the ZIP file.
- [ ] The notification link downloads a ZIP file that contains all six item types.
- [ ] The ZIP file name follows the GL-08 pattern.

WHERE Project page header, next to project name

START IN CODE `app/api/engagements/[id]/doc-pack/zip/route.ts` `src/lib/doc-pack/` `src/components/incorporation/IncorporationDraftsZipLink.tsx`

NOTE Proposal: put the button in the project page header, with one folder for each item type in the ZIP file. Open question: can the Client also download the ZIP file?

CD · 6 · Client details and questionnaire

Client details form and Proposed directors. · 5 items

CD-01 Remove the "How many directors?" question

UI change · P2 · Effort S · L M A C

NOW

The form asks for the number of directors first. The answer sets the number of director slots that the form shows.

REQUIRED CHANGE

1. Remove the "How many directors?" question from the Proposed directors section.
2. Get the number of directors from the number of director cards (see CD-02).
3. Get the minimum number of directors from the company type.
4. Do the minimum check when the user submits the section, not before.
5. Show an error message that tells the user the minimum number of directors.
6. Keep all director details that current projects contain.

ACCEPTANCE CHECKS

- [ ] The Proposed directors section shows no question about the number of directors.
- [ ] A private company with one director gets an error message at submit time.
- [ ] A private company with two directors submits without an error.
- [ ] Current projects show the same directors as before the change.

WHERE Client details, Proposed directors section **START IN CODE** `src/lib/checklist/checklist-responses.ts` `src/lib/checklist/checklist-pre1-validation.ts`

NOTE Depends on CD-02. Example of the minimum rule: a private company must have two directors or more.

CD-02 One collapsible card per director, with "+ Add director"

UI change · P2 · Effort M · L M A C

NOW

The form shows a fixed number of director slots. The user cannot add or remove one director directly.

REQUIRED CHANGE

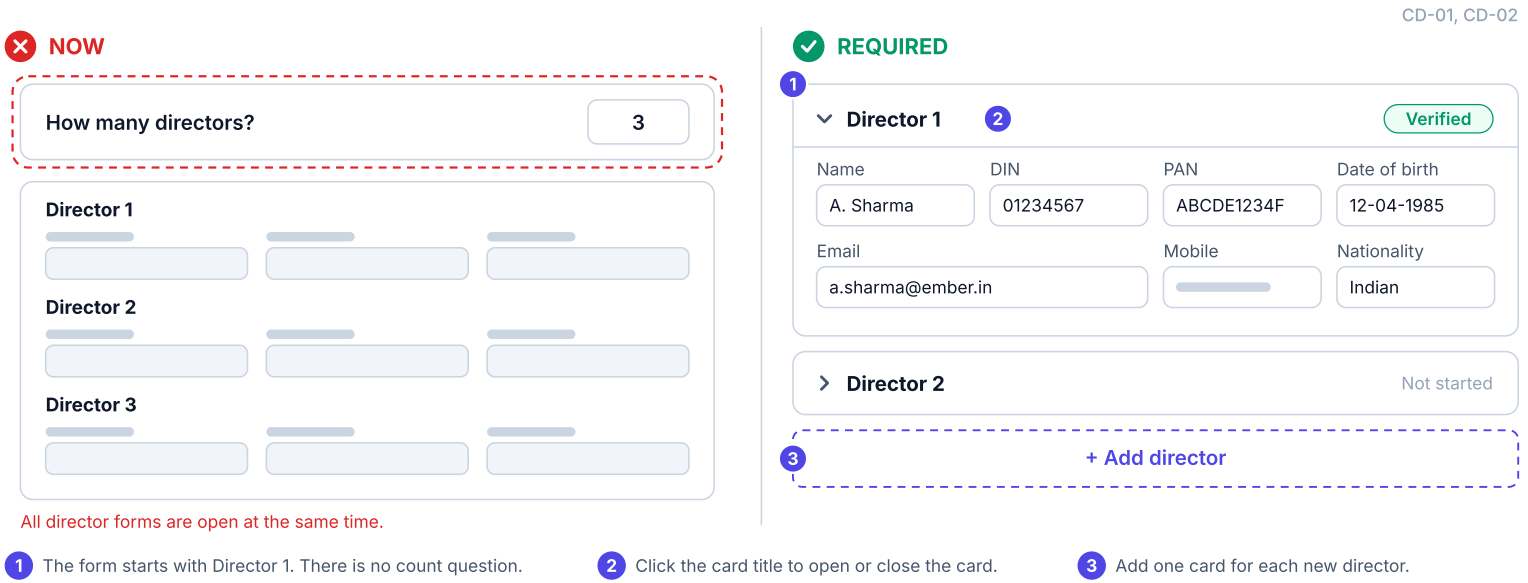

1. Show one card with the title "Director 1" when the section opens.
2. Add a chevron to each card header to open and close the card.
3. Add a "+ Add director" button below the last card.
4. Let the user remove each director, but not the last one.
5. Ask for confirmation before the app removes a card that contains data.
6. Show the director name and a complete or incomplete status in the header of a closed card.

ACCEPTANCE CHECKS

- [ ] A new section shows one open card with the title "Director 1".
- [ ] A click on "+ Add director" adds a "Director 2" card below "Director 1".
- [ ] A click on the chevron closes the card and keeps the typed data.
- [ ] The "Remove" button is not available when the section has only one card.

WHERE Client details, Proposed directors section **START IN CODE** `src/lib/checklist/checklist-responses.ts` `src/views/incorporation/milestone-form/`

NOTE Give the cards new numbers in sequence after a removal. CD-01 depends on this item.

For CD-01 · CD-02 **Figure 9** · One card for each director. No count question.

CD-03 Director details in a horizontal grid (spreadsheet layout)

Feature · P2 · Effort L · L M A C

NOW

Director details are in a vertical form, one director below the other. The user cannot see all directors side by side.

REQUIRED CHANGE

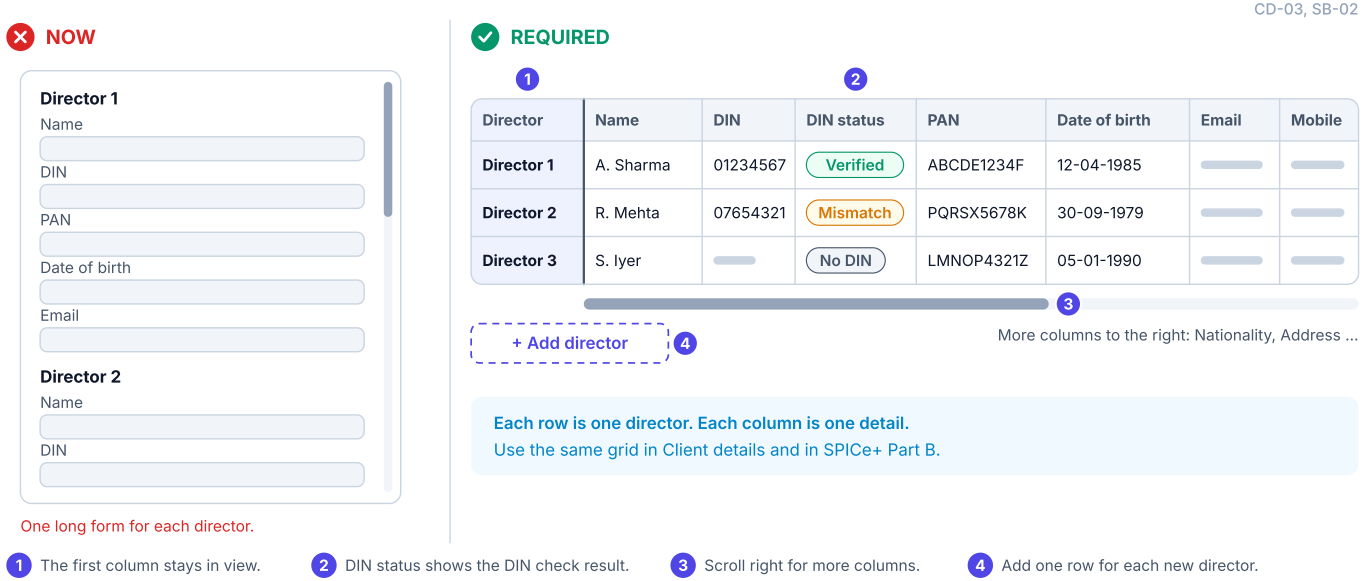

1. Add a grid view with one row for each director and one column for each field.
2. Let the user scroll the grid horizontally when the columns do not fit the screen.
3. Keep the first column (director name) in view while the user scrolls horizontally.
4. Move the cursor to the next cell when the user pushes Tab.
5. Use the same data and the same validation rules as the director cards in CD-02.
6. Add a control that changes between the card view and the grid view.

ACCEPTANCE CHECKS

- [ ] The grid shows one row for each director and one column for each field.
- [ ] The director name column stays in view when the user scrolls to the last column.
- [ ] The Tab key moves the cursor from one cell to the next cell in the row.
- [ ] Data typed in the grid shows in the director card, and the opposite.

WHERE Client details, Proposed directors section **START IN CODE** `src/views/incorporation/milestone-form/` `src/lib/checklist/checklist-responses.ts`

NOTE Proposal: a "Cards / Grid" control changes the view; "+ Add director" adds a row in the grid. Paste from Excel is an optional P3 addition.

For CD-03 · SB-02 **Figure 10** · Director details in a horizontal grid.

CD-04 Rename "Initial share capital" to "Paid-up share capital"

Content · P2 · Effort S · L M A C

NOW

The app uses the word "Initial" for this value. An example is "Initial Paid-up Share Capital (INR)" in the client details form.

REQUIRED CHANGE

1. Change the label to "Paid-up share capital" in all forms.
2. Change the label in all summaries, help texts and error messages.
3. Change the label in all generated documents and all exports.
4. Search the full code base for "Initial" capital labels and change each one.
5. Do not change the stored data keys.

ACCEPTANCE CHECKS

- [ ] A search of the app screens finds no "Initial share capital" or "Initial paid-up" label.
- [ ] A newly generated document shows "Paid-up share capital".
- [ ] Values saved before the change show below the new label.

WHERE All forms, summaries, documents and exports

START IN CODE `src/data/checklist.ts` `src/data/ask/field-help.ts`

NOTE Keep the "(INR)" unit and the example value where the label has them now.

CD-05 "Existing interest in company" → "Any Indian company" (placeholder line item)

Content · P3 · Effort S · L M A C

NOW

The field label is "Existing interest in any other company or LLP?". The owner wants the label "Any Indian company".

REQUIRED CHANGE

1. Change the field label to "Any Indian company".
2. Keep the current answer options and sub-questions until the owner gives the details.
3. Do not change the stored data keys.
4. Keep this line item open until the owner gives the full field definition.

ACCEPTANCE CHECKS

- [ ] The field shows the label "Any Indian company" for every role.
- [ ] Answers saved before the change show below the new label.

WHERE Proposed directors, interest in other companies

START IN CODE `src/lib/checklist/checklist-responses.ts`

NOTE Blocked: the owner will give the field details later. This item is a placeholder. Do only the label change now.

DR · 7 · Directors and DIN

DIN checks and who fills the director data. · 4 items

DR-01 DIN verification flow

Feature · P2 · Effort M · L M A C

NOW

The form asks for the DIN of each director and saves the typed number. The app records no verification result.

REQUIRED CHANGE

1. Ask "Does the director have a DIN?" with the answers Yes and No.
2. If Yes, get the name, father's name, date of birth and DIN status from MCA director master data.
3. Compare the MCA data with the typed details.
4. Show one badge on the director: "Verified", "Mismatch" or "Not found".
5. Record the user and the time of each verification.
6. If No, check the typed details and KYC documents only, and show "DIN to be applied in SPICe+".

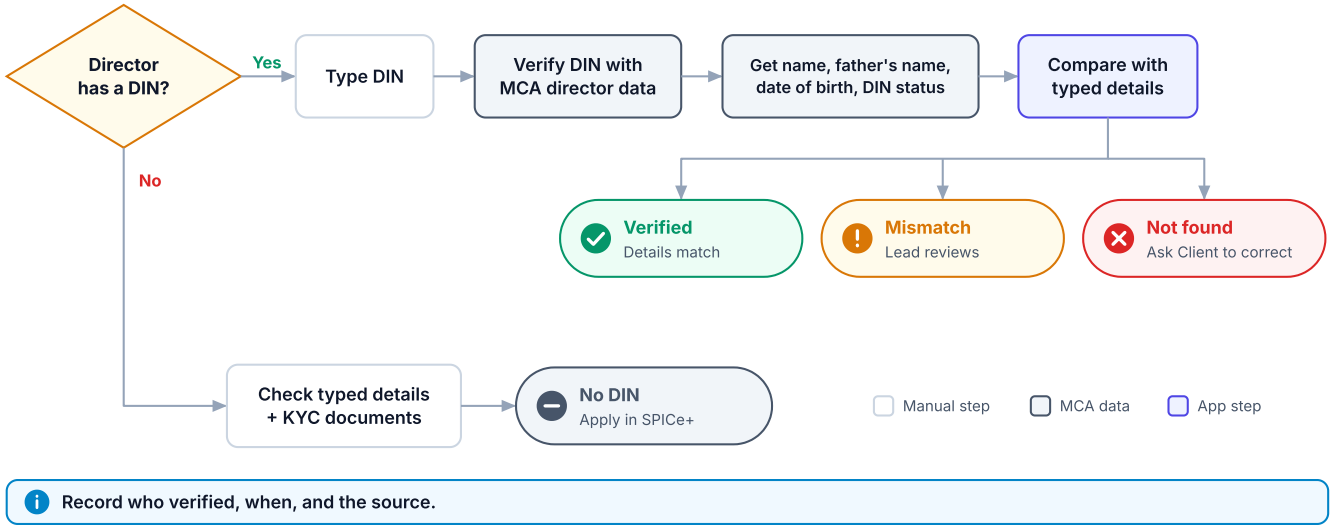

ACCEPTANCE CHECKS

- [ ] A DIN with the same details as the typed details shows the "Verified" badge.
- [ ] A different name or date of birth shows the "Mismatch" badge and the fields that are different.
- [ ] The badge shows the name of the user and the time of the verification.
- [ ] A director with no DIN shows "DIN to be applied in SPICe+" and no DIN badge.

WHERE Proposed directors, DIN field

START IN CODE `src/lib/checklist/checklist-responses.ts` `src/lib/checklist/checklist-part-b-validation.ts`

NOTE Open question: MCA has no public API. Proposal: Lead verifies manually with a screenshot first; design the status field so a paid lookup API can fill it later.

For DR-01 · SB-02 **Figure 11** · DIN verification flow.

DR-02 Only the Client fills the Proposed directors section

Feature · P2 · Effort M · L M A C

NOW

The Lead can fill the Proposed directors section now. The owner wants only the Client to give these details.

REQUIRED CHANGE

1. Let only the Client edit the Proposed directors section by default.
2. Show the section to the Lead, Manager and Admin as read-only.
3. Show a banner at the top of the section that tells who must fill it.
4. Do the edit check on the server, not only on the screen.
5. Let the Lead continue to review the section after the Client submits it.

ACCEPTANCE CHECKS

- [ ] A Lead opens the section and cannot change a field.
- [ ] A Client opens the section and can change and save each field.
- [ ] The server refuses a save request from a Lead account.
- [ ] Staff roles see the banner "The Client must fill this section".

WHERE Proposed directors section, all roles **START IN CODE** `src/lib/checklist/checklist-client-fill.ts`

NOTE Open question: does this rule also apply to the Proposed directors in SPICe+ Part B (SB-02)? DR-04 gives the override.

DR-03 Notify the Client when the Proposed directors step starts

Feature · P2 · Effort S · L M A C

NOW

The owner reports that the Client does not know when the Proposed directors step starts.

REQUIRED CHANGE

1. Send the Client an in-app notification when the Proposed directors step starts.
2. Tell the Client in the notification text that the Client must fill the director details.
3. Make the "Open" button of the notification go to the Proposed directors step (see GL-01).
4. Prepare an email to the Client with the same message and a link to the step.
5. Send the notification to every Client user of the project.
6. Send the notification one time only for each start of the step.

ACCEPTANCE CHECKS

- [ ] The Client sees a new in-app notification when the step starts.
- [ ] The "Open" button opens the Proposed directors step directly.
- [ ] The email contains the project name and a link to the step.

WHERE Proposed directors step, Client notifications

START IN CODE `src/lib/notify/` `src/lib/checklist/checklist-client-fill.ts`

NOTE Open question: is this email automatic, or does the Lead send it manually with the GL-07 "Send email" button? GL-07 permits no automatic emails.

DR-04 Manager / Admin button: "Assign to Lead"

Feature · P2 · Effort M · L M A C

NOW

The app has no control that moves the Proposed directors task from the Client to the Lead.

REQUIRED CHANGE

1. Add an "Assign to Lead" button to the section header for Manager and Admin only.
2. Let the Lead edit the section after the Manager or Admin clicks the button.
3. Change the banner to "The Lead must fill this section".
4. Send the Lead an in-app notification about the new task.
5. Record the user, the time and the project in the audit log.
6. Add an "Assign to Client" button that sets the section back.

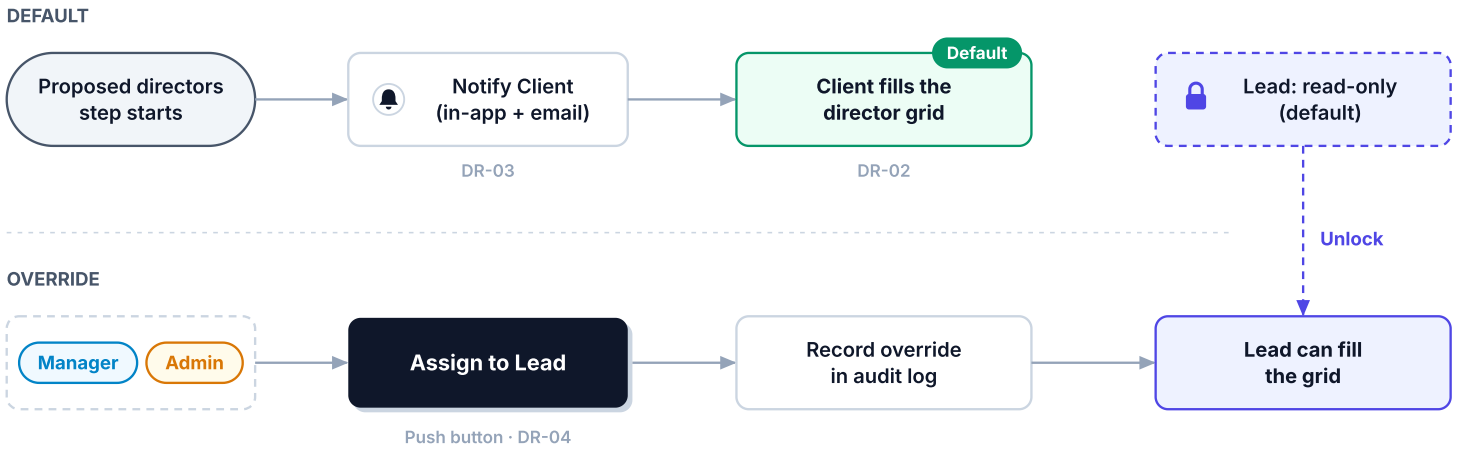

ACCEPTANCE CHECKS

- [ ] Lead and Client accounts do not see the "Assign to Lead" button.
- [ ] After a Manager clicks the button, the Lead can edit and save the section.
- [ ] The audit log shows a record with the Manager name, the time and the action.
- [ ] The banner names the Lead as the person who must fill the section.

WHERE Proposed directors section header

START IN CODE `src/lib/checklist/checklist-client-fill.ts` `src/lib/checklist/checklist-step-approval.ts`

NOTE Proposal: the Client keeps edit access after the override, so the Lead and the Client can both fill the section. The owner's first label was "Make Lead fill this".

For DR-02 · DR-03 · DR-04 **Figure 12** · Who fills the Proposed directors section.

SA 8 · SPICe+ Part A

Fields on the SPICe+ Part A steps. · 2 items

SA-01 "Acknowledgement number" field on every application

Feature · P2 · Effort M · L M A C

NOW

The MCA filing card has an SRN field below "Portal references". The owner reports that not every filed application asks for this number.

REQUIRED CHANGE

1. Add an "Acknowledgement number (SRN)" text field to every filed application step.
2. Include name reservation (RUN), SPICe+ Part A, SPICe+ Part B and each other application.
3. Let the Lead fill the field.
4. Do not let the step change to "Filed" while the field is empty.
5. Show the number on the step card and in all exports.
6. Use the current SRN field of the MCA filing card where it is available.

ACCEPTANCE CHECKS

- [ ] Each filed application step shows the "Acknowledgement number (SRN)" field.
- [ ] An empty field stops the "Filed" status and shows an error message.
- [ ] The saved number shows on the step card and in the Excel export.

WHERE Every filed application step **START IN CODE** `src/components/incorporation/McaFilingCard.tsx`

NOTE Proposal: use one label, "Acknowledgement number (SRN)", for all applications, and use the SRN field of the MCA filing card again, not a second field.

SA-02 Name approval expiry date must be editable

Feature · P2 · Effort S · L M A C

NOW

The app calculates the name approval expiry date. The owner reports that the user cannot change this date.

REQUIRED CHANGE

1. Let the Lead, Manager and Admin change the name approval expiry date.
2. Keep the calculated date as the default value.
3. Record the old value, the new value, the user and the time for each change.
4. Use the new date for all reminders and alerts.
5. Show the new date to the Client as read-only.

ACCEPTANCE CHECKS

- [ ] A Lead changes the date and the new date stays after a page reload.
- [ ] The audit log shows the old value, the new value, the user and the time.
- [ ] The expiry reminder uses the new date.
- [ ] A Client account cannot change the date.

WHERE Name approval step, expiry date field START IN CODE `src/views/incorporation/milestone-form/field-cascade.ts` `src/components/incorporation/Phase1StepPanelRoutePanels.tsx`

NOTE Proposal: show an "Edited" mark next to a date that is different from the calculated date.

SB 9 · SPICe+ Part B

Part B must match the MCA portal form. · 3 items

SB-01 Part B questions must match the MCA portal form sections (3A, 3B ...)

Content · P2 · Effort L · L M A C

NOW

The Part B questions use the groups and the order of the app. The groups do not show the MCA section numbers.

REQUIRED CHANGE

1. Put the Part B questions in groups with the same section numbers and names as the MCA form.
2. Keep the same order of sections and questions as the MCA form.
3. Use the same question labels as the MCA form.
4. Show the section number, for example "3A", on each group header.
5. Show the section numbers in the side panel also.
6. Do not change the stored answers of current projects.

ACCEPTANCE CHECKS

- [ ] Each group header shows an MCA section number and name.
- [ ] The section order and the question order are the same as in the MCA form document.
- [ ] A user can copy the answers into the MCA portal, one section after the other.
- [ ] Answers of current projects stay with the correct questions.

WHERE SPICe+ Part B question pages START IN CODE `src/data/checklist.ts` `src/lib/checklist/checklist-responses.ts`

NOTE Blocked: the owner must give the MCA SPICe+ Part B form document. Make the section map from that document.

SB-02 Proposed directors in Part B: same grid and DIN check as CD-03 / DR-01

Feature | P2 | Effort M | L M A C

NOW

Part B shows the proposed directors in a vertical form. Part B records no DIN verification result.

REQUIRED CHANGE

1. Use the grid component from CD-03 for the proposed directors in Part B.
2. Use the DIN verification flow from DR-01 in Part B.
3. Make one shared component for the two screens, not a copy.
4. Fill the Part B grid with the director details from the client details section.
5. Show the DIN badge from DR-01 in each director row.
6. Add the fields that only Part B uses as more columns.

ACCEPTANCE CHECKS

- [ ] The Part B grid looks and operates the same as the CD-03 grid.
- [ ] A DIN verification done in client details shows the same badge in Part B.
- [ ] The code has one grid component that the two screens use.

WHERE SPICe+ Part B, Proposed directors START IN CODE `src/lib/checklist/checklist-part-b-validation.ts` `src/lib/checklist/checklist-responses.ts`

NOTE Depends on CD-03 and DR-01. Do those items first.

SB-03 Subscriber details: conditional questions

Feature | P2 | Effort M | L M A C

NOW

The Subscriber details form has a subscriber type field. It does not ask all the follow-up questions that the owner wants.

REQUIRED CHANGE

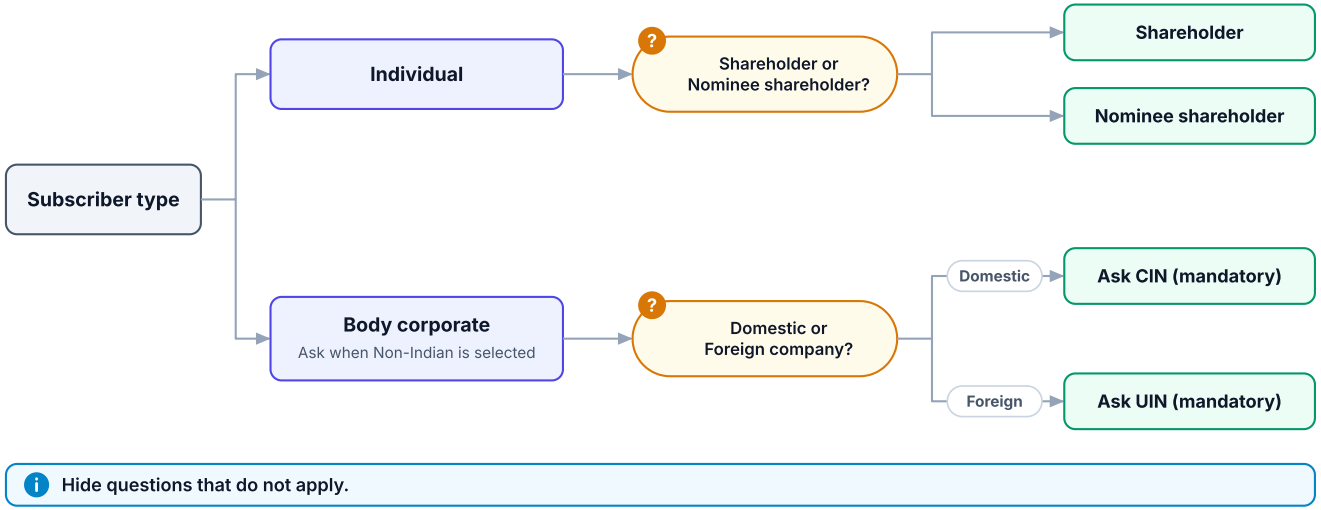

1. If the subscriber type is "Individual", ask "Shareholder" or "Nominee shareholder".
2. If "Non-Indian" is selected, show the subscriber type "Body corporate".
3. If "Body corporate" is selected, ask "Domestic company" or "Foreign company".
4. If "Domestic company" is selected, make the CIN field mandatory with exactly 21 characters.
5. If "Foreign company" is selected, make the UIN field mandatory.
6. Hide the questions that do not apply, and clear the answers of hidden questions.

ACCEPTANCE CHECKS

- [ ] "Individual" shows only the "Shareholder" or "Nominee shareholder" question.
- [ ] "Domestic company" shows the CIN field and refuses a value that is not 21 characters.
- [ ] "Foreign company" shows the UIN field and refuses an empty value.
- [ ] A change of subscriber type removes the answers of the hidden questions.

WHERE SPICe+ Part B, Subscriber details START IN CODE `src/lib/checklist/checklist-responses.ts` `src/lib/checklist/checklist-part-b-validation.ts`

NOTE Open question: is "Body corporate" offered only for Non-Indian subscribers? Confirm the identifier name for foreign companies (UIN).

For SB-03 **Figure 13** · Subscriber details: conditional questions.

BR 10 · Board resolutions and approvals

Board resolution steps, Client edits, approvals and status. · 7 items

BR-01 "Draft board resolution" step must show the generated draft

Feature · P2 · Effort M · L M A C

NOW

The step shows only a status chip and a link to the editor. The user cannot read the generated draft on the step.

REQUIRED CHANGE

1. Show an inline preview of the generated draft on the step card.
2. Show the version number and the date of the draft above the preview.
3. Add a "Download" button that gives the draft as a .docx file.
4. Use the standard file name from GL-08 for the downloaded file.
5. When no draft exists, show an empty state. Show the "Generate draft" button to the Lead only.
6. Show the preview to the Client only after the firm sends the draft to the Client.

ACCEPTANCE CHECKS

- [ ] After the Lead generates a draft, the step shows the full text of the draft.
- [ ] The step shows the version number and the date, for example "Version 2 · 11 Nov 2026".
- [ ] The "Download" button gives a file that has the same text as the preview.
- [ ] A new version of the draft replaces the preview and increases the version number by one.

WHERE Incorporation: "Draft board resolution" step

START IN CODE `src/components/incorporation/Phase1StepPanelRoutePanels.tsx` `src/views/intern/BoardResolutionEditorView.tsx`

NOTE Proposal: use the docx preview component that the app has now. Depends on GL-08 for the file name.

BR-02 "Signed board resolution" step must show the draft and the signed copy

Feature · P2 · Effort M · L M A C

NOW

The step does not show the draft and the signed copy together. The user cannot compare the two documents on one screen.

REQUIRED CHANGE

1. Show two panels side by side: "Draft" on the left and "Signed copy" on the right.
2. Show the last approved version of the draft in the "Draft" panel.
3. Add an "Open" button and a "Download" button to each panel.
4. Show the version number and the date on each panel. Show who uploaded the signed copy.
5. Show an upload area in the "Signed copy" panel until a signed copy exists.
6. Put the panels one below the other on screens narrower than 768 px.

ACCEPTANCE CHECKS

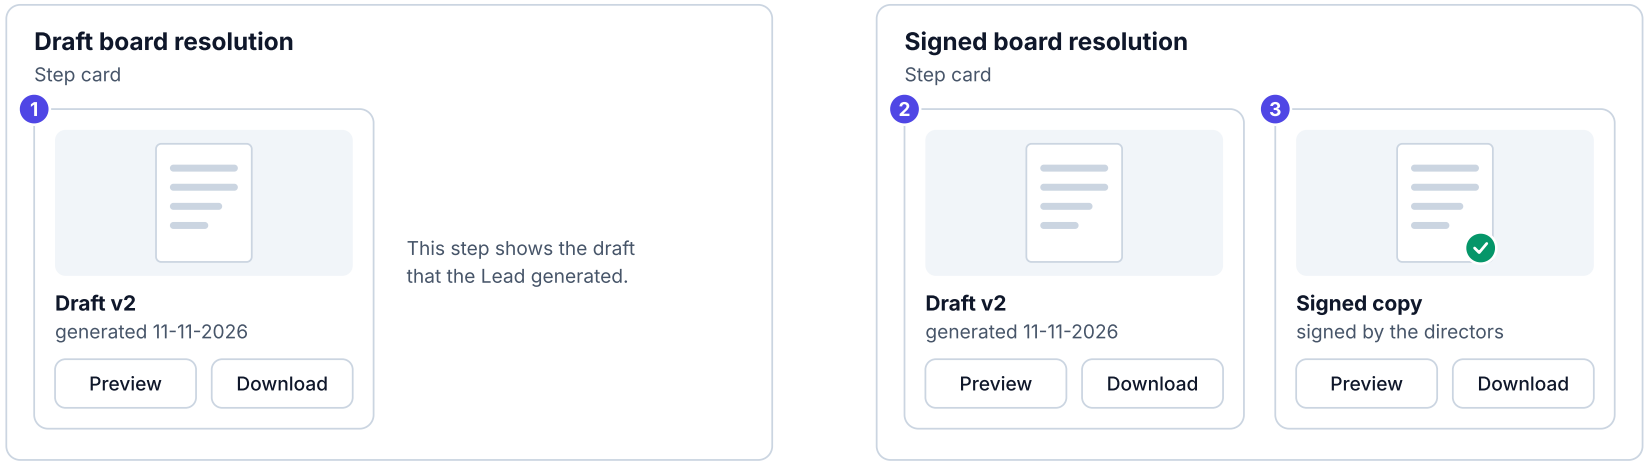

- [ ] With a draft and a signed copy, the step shows the two documents side by side.
- [ ] Each "Open" button opens the correct document in the document viewer.
- [ ] Each "Download" button gives the correct file with the standard file name (GL-08).
- [ ] Without a signed copy, the left panel shows the draft and the right panel shows the upload area.

WHERE Incorporation: "Signed board resolution" step

START IN CODE `src/components/incorporation/Phase1StepPanelRoutePanels.tsx` `app/api/engagements/[id]/board-resolution/download-signed/route.ts`

NOTE Depends on BR-01 (same preview component) and GL-08 (file name).

BR-01, BR-02

1 The draft step shows the generated draft. 2 The signed step shows the draft again. 3 The signed step also shows the signed copy.

For BR-01 · BR-02 **Figure 14** · Documents shown on the two board resolution steps.

BR-03 Client must see exactly who holds the work now

Bug · P1 · Effort M · L M A C

NOW

The Client always sees "[Lead name] is working on it". The text does not change when the Manager or the Admin holds the work.

REQUIRED CHANGE

1. Make the status chip follow the real workflow state. Use one function to compute it for every role and every step.
2. Show "With Lead" when the Lead prepares the draft and when the Client requests a change.
3. Show "With Manager (approval)" after the Lead sends the draft for approval.
4. Show "With Admin (approval)" after the Manager approves. Show "With you (Client)" after the firm sends the document to the Client.
5. Show "With MCA" after the firm files the document with MCA.
6. Show the name of the person and the time since the hand-over, for example "Anita · 2 hours".

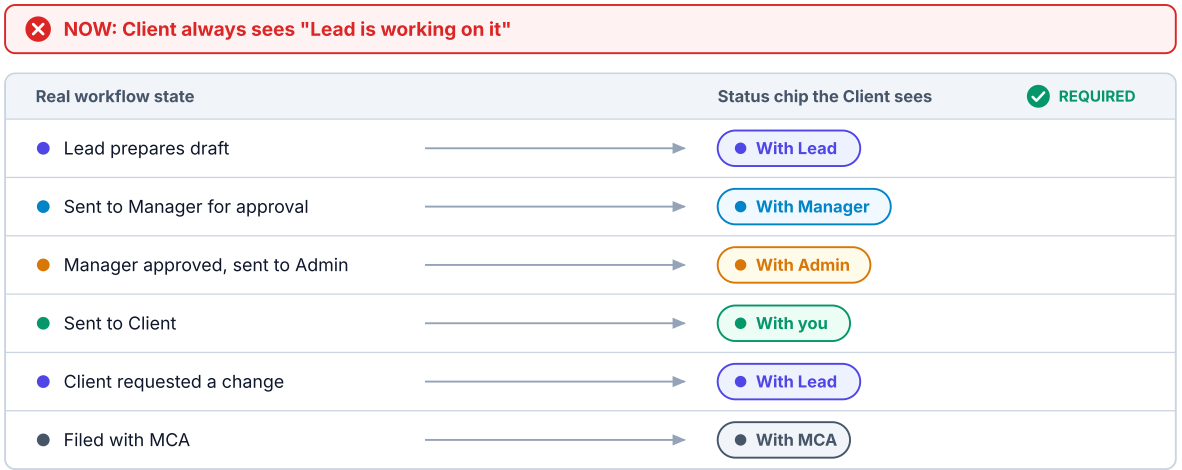

ACCEPTANCE CHECKS

- [ ] After the Lead sends the draft for approval, the Client sees "With Manager (approval)".
- [ ] After the Manager approves, the Client sees "With Admin (approval)" and the name of the Admin.
- [ ] The Lead, the Manager, the Admin and the Client see the same holder for the same step.
- [ ] An automated test checks each of the six states of the mapping.

WHERE Client portal: status chip on each step

START IN CODE `src/components/client-portal/pages/incorporation/StepPage.tsx` `src/lib/checklist/checklist-step-approval.ts`

NOTE The wrong text comes from the Client step page, which reads only the step owner. Open question: show staff names to the Client, or only the role?

For BR-03 **Figure 15** · The status that the Client sees must follow the real state.

BR-04 Client can edit the draft board resolution in the app (with audit record)

Feature · P2 · Effort L · L M A C

NOW

The Client cannot edit the draft. The Client can only request a change, and the Lead makes the change.

REQUIRED CHANGE

1. Add an "Edit draft" button that opens the draft in an editor in the app.
2. On each save, record the user name, the Client member role, the time and the changed text (before and after).
3. Keep the original version from the firm. Do not let a Client edit replace it.
4. Show the Client edits to the Lead as tracked changes: added text and removed text in different colours.
5. Show the audit record of the document to the Lead, the Manager and the Admin.
6. Let the Client edit only while the status is "With you (Client)".

ACCEPTANCE CHECKS

- [ ] A Client member changes one sentence and saves: the audit record shows name, role, time, old text and new text.
- [ ] The Lead opens the draft and sees the changed sentence marked as a tracked change.
- [ ] The original version from the firm can be opened and downloaded after the Client edits.
- [ ] A Client member cannot edit the draft when the status is not "With you (Client)".

WHERE Client portal: "Draft board resolution" step **START IN CODE** `src/views/intern/BoardResolutionEditorView.tsx` `src/lib/board-resolution/board-resolution-preview-editable.ts` `src/components/client/ClientChangeRequestButton.tsx`

NOTE Proposal: use the Lead's board resolution editor again, with a Client role. This changes the current rule that only the firm edits documents. Depends on BR-03.

BR-05 Client edit → confirmation → Manager → Admin → send back to Client

Feature · P2 · Effort L · L M A C

NOW

No workflow exists for a draft that the Client edited. The approval chain starts only when the Lead sends a draft.

REQUIRED CHANGE

1. After the Client edits, show a "Confirm edits" button. The Client pushes it to lock the edits.
2. Then let the Client send the confirmed document to the firm by email with the GL-07 pop-up.
3. Let the Lead push "Confirm receipt". Then send the document to the Manager for review.
4. Let the Manager approve or return the document. After the Manager approves, let the Admin approve or return it.
5. Send each returned document back to the Lead. Make the reason for the return mandatory.
6. After the Admin approves, let the Lead send the final document back to the Client.

ACCEPTANCE CHECKS

- [ ] The seven steps occur only in this sequence: edit, confirm, email, receipt, Manager, Admin, send to Client.
- [ ] The Admin cannot approve before the Manager approves.
- [ ] A return without a reason is not possible. The returned document shows in the work list of the Lead.
- [ ] The status chip (BR-03) shows the correct holder after each step.

WHERE "Draft board resolution" step, all roles **START IN CODE** `src/lib/checklist/checklist-step-approval.ts` `src/lib/projects/`

NOTE Depends on BR-03, BR-04, BR-06 and GL-07. Open question: after a return, does the Lead correct the document, or must the Client edit again?

BR-06 Notify every participant after each edit or status change

Feature · P2 · Effort M · L M A C

NOW

Not every participant gets a notification after each action on the board resolution. Some participants do not know that the status changed.

REQUIRED CHANGE

1. Send an in-app notification after each edit, confirmation, approval, return and send.
2. Send it to the Lead, the Manager, the Admin and all Client members of the project.
3. Put these items in each notification: who did the action, what the action was, who holds the work now.
4. Make the "Open" button go to the exact step of the board resolution (see GL-01).
5. Do not send the notification to the user who did the action.
6. Do not send an email automatically. Email stays manual (see GL-07).

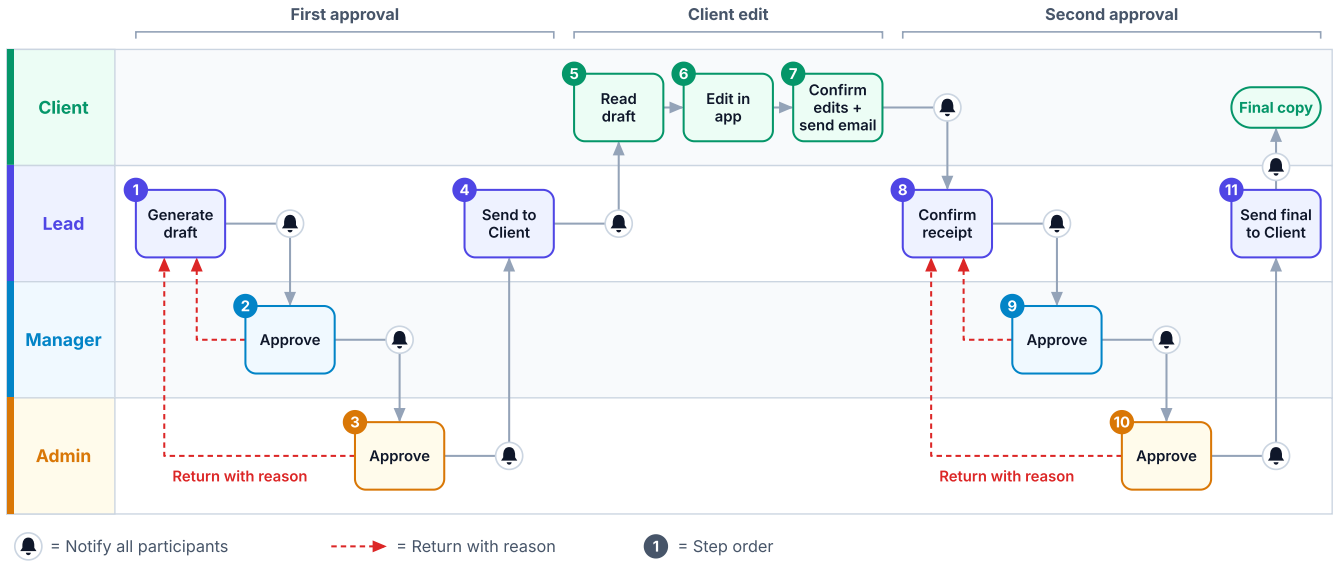

ACCEPTANCE CHECKS

- [ ] After the Manager approves, the Lead, the Admin and each Client member get one notification each.
- [ ] The "Open" button of each notification opens the correct project and the correct step.
- [ ] Each action in BR-05 makes exactly one notification for each recipient.
- [ ] The notification text shows the name of the user, the action and the new holder.

WHERE Notifications for the board resolution workflow

START IN CODE `src/lib/notify/` `src/components/notifications/NotificationItem.tsx`

NOTE Proposal: put all saves by one Client member in 10 minutes into one notification. Depends on GL-01 and BR-05.

For BR-04 · BR-05 · BR-06 **Figure 16** · Board resolution: edit, confirmation and approval flow.

BR-07 "Request a change": manual text box + "Send to Lead"; chatbot path also works

Feature · P2 · Effort S · L M A C

NOW

On some steps, the "Request a change" button opens the chatbot. The Client cannot always type the request directly.

REQUIRED CHANGE

1. Show a text box on the "Request a change" pop-up on every step.
2. Name the button "Send to Lead". Keep it disabled until the Client types text.
3. Let the chatbot make the same change request record when the Client types "request a change in ...".
4. Make the chatbot show the request text and get a confirmation from the Client before it sends.
5. Make sure that the two paths give the same record, the same notification and the same audit record.
6. Keep the chatbot optional. Never make the chatbot the only path.

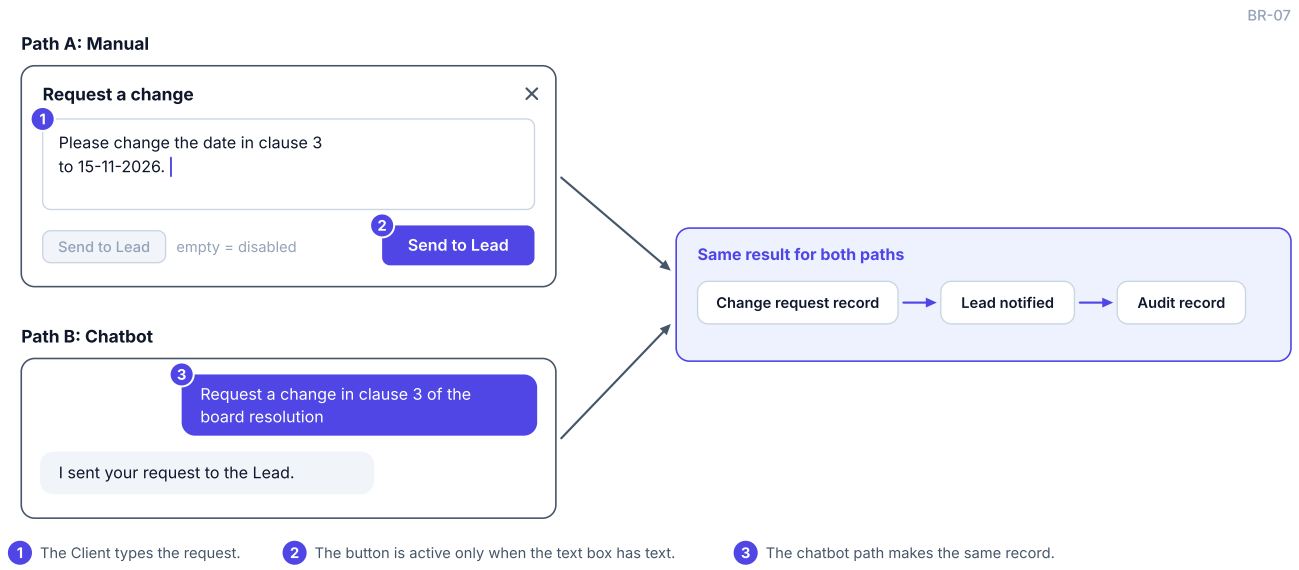

ACCEPTANCE CHECKS

- [ ] With an empty text box, "Send to Lead" is disabled. With one typed character, it is enabled.
- [ ] A manual request and a chatbot request for the same step make identical tasks for the Lead.
- [ ] The Lead gets one notification for each request, with a link to the step (GL-01).
- [ ] The audit record shows the Client member, the time, the step and the path (manual or chatbot).

WHERE Client portal: "Request a change" pop-up

START IN CODE `src/components/client/ClientChangeRequestButton.tsx` `src/components/client-portal/pages/incorporation/StepPage.tsx`

NOTE A manual pop-up exists already, but some steps open the chatbot. Proposal: use the manual pop-up on every step.

For BR-07 **Figure 17** · Two paths to request a change. One result.

LP 11 · Landing page

Public landing page: theme, protection and animation. · 3 items

LP-01 Default light theme, with a dark-theme toggle

UI change | P2 | Effort M | Public visitor

NOW

The landing page has one theme only. A visitor cannot change the theme.

REQUIRED CHANGE

1. Use the light theme as the default for a first-time visitor.
2. Add a theme toggle with a sun icon and a moon icon to the header.
3. Keep the choice of the visitor on the device. Use it on the next visit.
4. Make sure that text and controls in every section pass WCAG AA contrast in the two themes.
5. Use a logo file that is correct for each theme.
6. Set the theme before the first paint so that the page does not flash.

ACCEPTANCE CHECKS

- [ ] A new visitor with no saved choice sees the light theme.
- [ ] One push of the toggle changes every section to the dark theme without a page reload.
- [ ] After a page reload, the page opens in the theme that the visitor selected.
- [ ] An automated contrast check passes for the two themes.

WHERE Landing page: header and all sections START IN CODE `src/components/marketing/landing/landing.css` `src/components/marketing/landing/LandingScreen.tsx`

NOTE Proposal: do not follow the system dark setting on the first visit, because the owner wants light as the default. The LP-02 and LP-03 illustrations must support the two themes.

LP-02 Do not show screenshots of the app (protect the product idea)

Security | P1 | Effort M | Public visitor

NOW

The landing page shows ten real screenshots of the app, with screen layouts, field names and numbers. A competitor can copy the product idea from them.

REQUIRED CHANGE

1. Remove all real screenshots and screen recordings of the app from the landing page.
2. Use abstract illustrations and animations that show the benefit, not the screens.
3. Do not show real field names, lists of workflow steps or data layouts.
4. Show only a small number of chosen sections. Remove the sections that show each portal in detail.
5. Check the Open Graph image, the page source and the public folder for image files of the app.
6. Remove the old screenshot files from the public folder so that a direct URL does not open them.

ACCEPTANCE CHECKS

- [ ] No image or video on the landing page shows a real screen of the app.
- [ ] A direct request for each old screenshot URL gives a 404 response.
- [ ] The Open Graph image and the image alt texts do not show or describe a real screen.
- [ ] The owner approves the list of sections before the release.

WHERE Landing page: all sections and metadata START IN CODE `src/components/marketing/landing/LandingScreen.tsx` `public/landing/`

NOTE Open question: which sections stay? Proposal: hero, benefits, how it works (abstract), security, "Book a demo". The alt texts describe each screen in detail now; change them too.

LP-03 Right-side animations that change with the rotating headline word

Feature | P3 | Effort L | Public visitor

NOW

The hero headline rotates three words: compliance, incorporation, registration. The right side shows one static screenshot that does not change with the word.

REQUIRED CHANGE

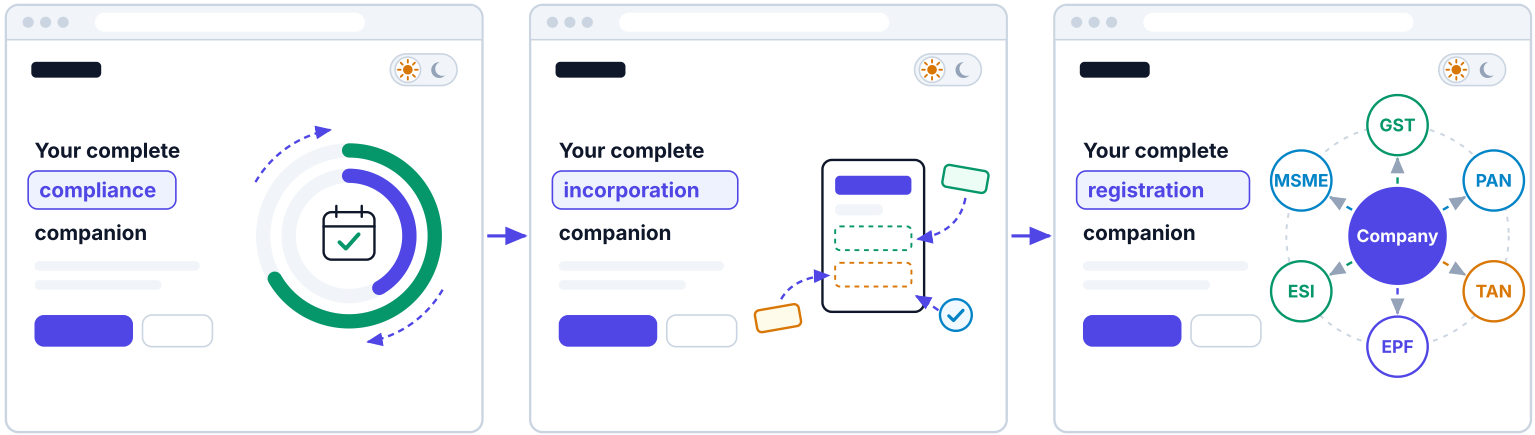

1. Keep the rotating headline words on the left side of the hero.
2. Show one animation for each word on the right side. Change the animation in step with the word.
3. For "registration", show the hub animation: the company in the centre, connected to all registrations.
4. Do not use static images or screenshots in the hero (see LP-02).
5. Obey "prefers-reduced-motion": stop the movement and show the last frame of each animation.
6. Keep the hero light: vector graphics only, a fixed size for the animation area, no layout shift.

ACCEPTANCE CHECKS

- [ ] Each headline word has its own animation, and the word and the animation change at the same moment.
- [ ] The hero area keeps the same size during each change (no layout shift).
- [ ] With reduced motion set in the operating system, nothing moves in the hero.
- [ ] The hero loads no screenshot file and no video file.

WHERE Landing page: hero **START IN CODE** `src/components/marketing/landing/LandingScreen.tsx` `src/components/marketing/landing/content.ts`

NOTE Proposal: SVG and CSS animations, no video, hero graphics below 150 KB. Open question: the owner must confirm the list of words and one visual idea for each word.

For LP-01 · LP-02 · LP-03 **Figure 18** · Landing page hero: animation changes with the headline word.

12 · Decisions that the owner must make

These items cannot be completed until the owner gives an answer or a document. Write the answer in the last column.

NO.	CHANGE	KIND	QUESTION OR MISSING INPUT	ANSWER
GL-07	Manual "Send email" button with editable pre-filled pop-up (no automatic emails)	Question	Do scheduled reminders and digests stay automatic? Proposal: yes. Proposal: send the WhatsApp message only after the user sends the email.	
PR-02	Download the full project as a ZIP file	Question	Can the Client also download the ZIP file?	
CD-05	"Existing interest in company" → "Any Indian company" (placeholder line item)	Blocked	Blocked: the owner will give the field details later. This item is a placeholder. Do only the label change now.	
DR-01	DIN verification flow	Question	MCA has no public API. Proposal: Lead verifies manually with a screenshot first; design the status field so a paid lookup API can fill it later.	
DR-02	Only the Client fills the Proposed directors section	Question	Does this rule also apply to the Proposed directors in SPICe+ Part B (SB-02)? DR-04 gives the override.	
DR-03	Notify the Client when the Proposed directors step starts	Question	Is this email automatic, or does the Lead send it manually with the GL-07 "Send email" button? GL-07 permits no automatic emails.	
SB-01	Part B questions must match the MCA portal form sections (3A, 3B ...)	Blocked	Blocked: the owner must give the MCA SPICe+ Part B form document. Make the section map from that document.	
SB-03	Subscriber details: conditional questions	Question	Is "Body corporate" offered only for Non-Indian subscribers? Confirm the identifier name for foreign companies (UIN).	
BR-03	Client must see exactly who holds the work now	Question	Show staff names to the Client, or only the role?	
BR-05	Client edit → confirmation → Manager → Admin → send back to Client	Question	After a return, does the Lead correct the document, or must the Client edit again?	
LP-02	Do not show screenshots of the app (protect the product idea)	Question	Which sections stay? Proposal: hero, benefits, how it works (abstract), security, "Book a demo". The alt texts describe each screen in detail now; change them too.	
LP-03	Right-side animations that change with the rotating headline word	Question	The owner must confirm the list of words and one visual idea for each word.	

Rules for all work on this list

1. Use one component for one function. Do not make a second copy for a different role or page.
2. Run slow work (Excel, ZIP, documents, email) as a background job. Do not run it in the page request.
3. Record each edit, approval and override in the audit log with the user and the time.
4. Do each acceptance check for all affected roles before you close the item.
