VCFO Suite
BY sbc

COMPLIANCE COCKPIT

Your company, incorporated and compliant — in one app.

VCFO Suite is the web app SBC uses to set up your Indian company and then run its whole compliance life. You, your directors and our CA and CMA team work on the same record in the same app, from the first questionnaire to every annual filing.

34	5 roles	1 record	2-in-1
SPICe+ steps, in MCA order	one app for firm and client	incorporation → compliance, no hand-over	platform + SBC's CA/CMA team

WHAT ONLY VCFO SUITE DOES

Ten unique features · the first four below · all ten on page 13

U1 Incorporation to compliance

In one app, on the same record from the questionnaire to every filing. No hand-over, no re-entry.

U2 Documents write themselves

MCA drafts are built from the checklist answers, one set per director, downloaded as one ZIP.

U3 Manager approval gate

Nothing reaches the client unchecked, and every action is written to the audit log.

U4 The client is inside the app

Your own portal on your own phone, instead of status buried in email threads.

ABOUT VCFO SUITE

Where software meets a CA firm's practice

VCFO Suite is the system SBC's own CA and CMA team uses to incorporate companies and keep them compliant. We opened it up, so that clients work inside it with us.

Why we built it

For years we ran the same incorporation at client after client on email, WhatsApp and Excel. Directors called to ask for status. The same details were typed into ten documents. After the certificate of incorporation, the compliance calendar moved to a diary or to a different tool.

VCFO Suite is what we built to stop that. It holds the company's record from the first questionnaire to every annual filing, and it lets the client and our team work on that record together, with a manager checking each step before the client sees it.

THE SHORT VERSION

One app. One record. One accountable team.

- **U1** The record that incorporates the company also runs its compliance.
- **U4** The client works in the app, not on email threads.
- **U10** SBC's CA and CMA team is part of the engagement.

WHAT MAKES US DIFFERENT

U10

Built by practitioners

Designed by the CA and CMA team that files for clients every month, around the order MCA, GST and the ROC actually work in.

U9

India-native

SPICe+, REG-01, GST, TDS, PF, ESI, ROC and FEMA events are built in from the start. Nothing is adapted from a foreign template.

U1

One app from day 0 to every filing

The questionnaire, checklist, documents, registrations and yearly calendar all sit on one company record.

U4

Client inside the app

Directors see the journey, the next step, due dates and documents in their own portal, on a laptop or a phone.

Our premise. A company should never have to ask its advisers "where are we?". The answer should already be on its screen, checked by a manager and backed by a team that is accountable for it.

THE PROBLEM

Most incorporations and compliance calendars run on inboxes

Founders, CFOs and foreign parents setting up Indian subsidiaries tell us the same six things. None of them is about effort. Each comes from work spread across tools that do not talk to each other.

F1

Status lives in someone's inbox

Incorporation runs on email, WhatsApp and Excel, so the client never knows where things stand without calling.

F2

Same data, typed ten times

Each director's details are typed again into every MCA document. One typo means a resubmission.

F3

Compliance moves to a diary

After the certificate of incorporation, the calendar lives in another tool or a diary, and due dates are missed.

F4

Expiries arrive unannounced

Licences, DSCs and registrations lapse silently, and tax notices are answered late.

F5

Board papers are scattered

Notices, replies, minutes and signatures sit in several inboxes, and nobody holds the full set.

F6

Collections chased by hand

Invoices are followed up one email at a time, and bank credits are matched in spreadsheets.

THE CONSEQUENCES

- Late fees and penalties on missed ROC, GST and TDS dates.
- Licences, DSCs and registrations that lapse unnoticed.
- Directors embarrassed by notices, resubmissions and unsigned minutes.
- Months lost between deciding to incorporate and being ready to trade.

WHO THIS AFFECTS

- **Founders and directors**
- **Indian subsidiaries of foreign parents**
- **CFOs and finance heads**
- **CA and CS firms**

Each finding maps to one VCFO Suite answer.

- F1 → U4 **Client portal**
- F2 → U2 **Document generator**
- F3 → U1 **Calendar on the same record**
- F4 → U5 **Expiry and notice alerts**
- F5 → U7 **Board meetings**
- F6 → U8 **Receivables**

PRODUCT OVERVIEW

One platform for the company's whole life

VCFO Suite follows a company from the first questionnaire to every annual filing. Each stage writes to the same record, so nothing is typed twice and nothing is handed over.

1 **Onboard** — questionnaire
2 **Checklist** — 34 SPICe+ steps
3 **Documents** — MCA drafts
4 **Incorporate** — SPICe+ filing, COI
5 **Register** — GST and others
6 **Comply** — calendar, filings
7 **Grow** — meetings, cash, payroll

MODULE	WHAT IT DOES	KEY CAPABILITIES
Incorporation engine	Runs the 34-step SPICe+ checklist in MCA order.	Part A name intake; Part B capital, office, directors, subscribers, KYC and DSC; steps open in order; red marks on missing fields; auto-save.
Document generator	Builds the MCA drafts from the checklist answers.	MOA, AOA, DIR-2, DIR-8, subscription sheets, declarations, letters, board resolution; one set per director; one ZIP.
Registrations	Tracks each post-incorporation registration.	GST laid out like the portal's REG-01 tabs; one tracker for every other registration.
Compliance calendar	Keeps every company's yearly calendar.	GST, TDS, PF, ESI, ROC/MCA and FEMA events; reminders; filings register with proof; Mark filed; six status words.
Board meetings	Runs a meeting from notice to signed minutes.	224-item agenda library; manager approval; Word notice, invite and Teams link; Yes/No replies; quorum; MoM signing.
Receivables COMING SOON	Collects cash for the CFO.	Reminders before and after the due date; partner logins; camt bank import and auto-match; 9 currencies; ageing and forecast.
Payroll and labour registers COMING SOON	Keeps payroll and statutory registers.	Salary updates; payroll summary; statutory labour registers generated per establishment.
Proactive automation COMING SOON	Chases people so the team does not have to.	Request lists; T-60/T-30/T-7 expiry alerts; T-7/T-2 notice escalation; client health and SLA ladder; My day; weekly digest.
Ask VCFO	Answers from the client's own record.	Status answers; due dates and rules with citations; links to the right page; file drop of up to 50 files (coming soon).

Five roles, one approval gate. Super admin, admin, manager, project lead and client share one app. A lead's draft stays hidden until a manager approves it, so the client only ever sees checked work.

INCORPORATION ENGINE · DOCUMENT GENERATOR

Answer once. The documents write themselves

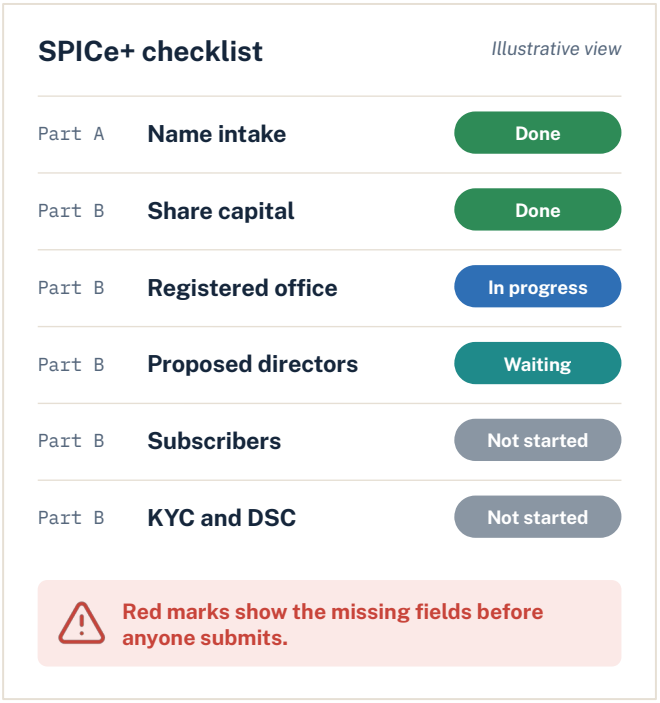

The incorporation runs as a 34-step SPICe+ checklist in the order MCA expects. Every answer is stored once and flows into each MCA draft, for each director.

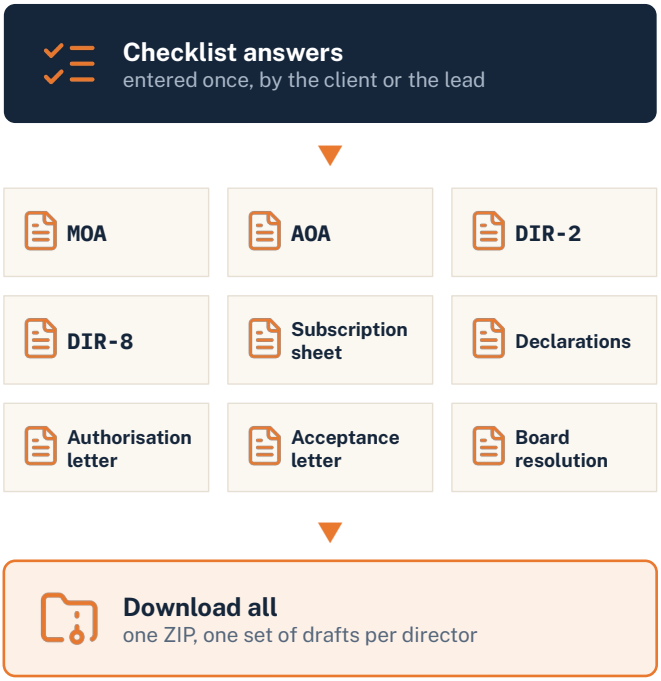

U1 **One app, one record**

The record built during incorporation becomes the company's compliance record. Nobody re-enters it.

U2 **Documents write themselves**

MCA drafts are generated from the checklist answers, one set per director, and download as one ZIP.

- Part A covers the name; Part B covers capital, registered office, proposed directors, subscribers, and KYC with DSC.
- Steps open in the right order, so nothing is filed before what it depends on.
- The client and the project lead fill the steps directly, and every field saves as they type.

The document pack lists every draft with what is still blocking it, so nobody files an incomplete set. Per-director documents are produced for each proposed director automatically.

Director 1 · Director 2 · Director 3 ...

Why it matters. One typo used to mean one resubmission. Now a correction is made once, in the checklist, and every document for every director picks it up.

COMPLIANCE CALENDAR · REGISTRATIONS

Indian compliance, built in rather than adapted

After the certificate of incorporation the company stays in the same app. Registrations start from the same record, and the yearly calendar is generated from the company's own obligations.

Registrations

GST registration is laid out like the portal's REG-01 tabs. Every other post-incorporation registration gets its own tracker.

Yearly calendar

Each company gets its own calendar of GST, TDS, PF, ESI, ROC/MCA and FEMA events, statutory and non-statutory, with due-date reminders.

Filings register

Every filing is recorded with its proof. "Mark filed" closes it, and the client sees the same entry in the portal.

One six-word status language, shared by the firm and the client on every screen.

Not started · In progress · Waiting · Due soon · Overdue · Done

OBLIGATION	WHO	WHEN	WHERE IT SHOWS
GST	Every GST-registered company	Monthly or quarterly returns, and the annual return	Calendar · filings register · client portal
TDS	Every company that deducts tax at source	Monthly deposits and quarterly returns	Calendar · filings register · client portal
PF	Establishments covered by the EPF Act	Monthly contributions and returns	Calendar · filings register · client portal
ESI	Establishments covered by the ESI Act	Monthly contributions and half-yearly returns	Calendar · filings register · client portal
ROC / MCA	Every company	Annual filings and event-based forms	Calendar · filings register · client portal
FEMA	Companies with foreign investment, such as Indian subsidiaries	Event-based reporting and annual returns	Calendar · filings register · client portal

Exact due dates follow the current notifications for each law and are kept up to date by SBC's team.

U9

India-native, not adapted

SPICe+, REG-01, GST, TDS, PF, ESI, ROC and FEMA are where the design starts. They are not add-ons bolted onto a generic task tool.

PROACTIVE AUTOMATION · ASK VCFO

The app chases for you, and answers for you

Most missed dates start as a missing file or a forgotten renewal. VCFO Suite follows up on its own, and Ask VCFO answers questions from the client's actual record.

U5 The app chases for you

COMING SOON

Request lists

The client is asked for files by email, then WhatsApp, then a call task for the lead.

Expiry alerts

Licences, DSCs and registrations alert at T-60, T-30 and T-7, and a renewal task opens itself.

Notice escalations

Tax notices are tracked with escalations at T-7 and T-2 before the reply is due.

Client health and SLA ladder

A nightly score per client. Slipping work moves from lead to manager to partner.

Every staff member also gets a "My day" card and email, and the firm gets a weekly digest.

Ask VCFO

U6

An AI assistant inside the app that knows the client's actual status and files. It links to the right page, and cites the rule when it explains a due date.

"Where is my incorporation?"

Reads the live checklist: which step is open, what is missing, and a link to that step.

"Why is this return due on that date?"

Explains the due date and the rule behind it, with a citation.

Drop files, get a review card

COMING SOON

- Staff drop files, folders or ZIPs, up to 50 files at once.
- Ask VCFO sorts them into one review card per client.
- It proposes the form fill from what it read.
- A person always approves before anything is saved.

The rule we kept. Automation suggests and reminds. A person on SBC's team always approves.

BOARD MEETINGS

Board meetings, end to end, in one place

From the notice to the signed resolution, every board meeting runs through one loop. Directors take part from their email; the full record stays in the app.

1 — Draft
The lead drafts the notice from a 224-item agenda library.

2 — Approve
A manager approves the notice before it is sent.

3 — Send
Email with the Word notice, calendar invite and Teams link.

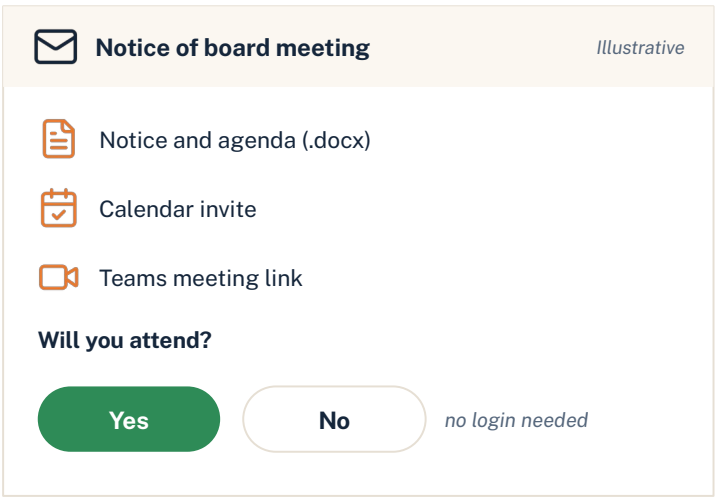

4 — Reply
Directors reply Yes or No from the email, without logging in.

5 — Quorum
The app forecasts quorum from the replies before the day.

6 — Meet
The meeting runs on the Teams link from the invite.

7 — Sign the minutes
The MoM is uploaded and goes round the signing loop.

8 — Carry forward
Resolutions are carried into the next notice.

224 agenda items in the library

1 loop notice, replies, minutes, signatures, resolutions

0 logins needed for a director to reply

U7 — Board meetings end to end

Notice, Teams, director Yes/No, minutes and signed resolutions, in one loop that the manager approves and the audit log records.

COMING SOON

Cash collection for the CFO, not just compliance

Each manager keeps an invoice sheet. VCFO Suite reminds the customer on a fixed schedule, matches the bank credit when it lands and reports what is still out.

Automatic reminders on every invoice

- 5 days before
- 3 days before
- On the due date
- Every day after

Partner logins and promise-to-pay

The customer's finance contact gets a login, sees open invoices and records a promise-to-pay date.

Bank import and auto-matching

Import ISO 20022 camt bank statements. Credits match to invoices, with tolerance for TDS and bank charges.

9

Forex desk in nine currencies

Raise invoices in nine foreign currencies and track each one through the forex desk.

Ageing and cash forecast

Ageing reports and a cash forecast built from due dates and the promises customers have made.

Payroll and labour registers

COMING SOON

Salary updates
Record changes as they happen.

Payroll summary
One view of the month's payroll.

Labour registers
Statutory registers per establishment.

U8

Receivables with bank matching and forex

The same app that keeps the company compliant also brings the cash in, which is why a CFO uses it and not only the company secretary.

CLIENT PORTAL · FIRM COCKPIT

What the client sees. What the firm sees

Both sides work on the same record. The client gets a calm portal with only approved work; the firm gets the cockpit that checks the work before it is shown.

U4 What the client sees

- Journey map, company snapshot and the next step
- Due dates, in the six status words
- Documents explorer with every approved draft
- Requests, messages and the SBC team
- Audit log of what was done and by whom
- Encrypted credentials vault
- Works on a phone

U3 What the firm sees

- Manager approval gate: drafts stay hidden until approved
- Approvals inbox across every client
- My day card and email for each staff member — COMING SOON
- Analytics and practice reports
- Team load and risks
- Outlook mail inside the app

One app, five roles

FEATURE	SUPER ADMIN	ADMIN	MANAGER	LEAD	CLIENT
Firm users and settings	✓	✓	–	–	–
Clients they can see	All	All	Team	Assigned	Own company
Fill the checklist and forms	✓	✓	✓	✓	✓
Approve work before the client sees it	✓	✓	✓	–	–
Analytics, team load and risks	✓	✓	✓	–	–
Approved documents, due dates, messages	✓	✓	✓	✓	✓

Simplified view. The platform applies the exact rules to every query, so a client never sees another client's data.

U3 · Nothing reaches the client unchecked. Every draft passes a manager first, and every action is logged.

TRUST AND SECURITY

Built so a client's data stays the client's

Compliance work carries PAN, Aadhaar, DSC and bank details. VCFO Suite treats that data as the most sensitive thing in the app, at every layer.

Role scoping on every query

Each database query is scoped to the user's role and clients. A client never sees another client's data.

Append-only audit log

Every action is written to a log that cannot be edited, with who did it and when.

Encrypted credentials vault

Portal logins and passwords the firm holds for a client are stored encrypted.

Two-step sign-in

TOTP two-step sign-in and session control, so a lost device can be signed out.

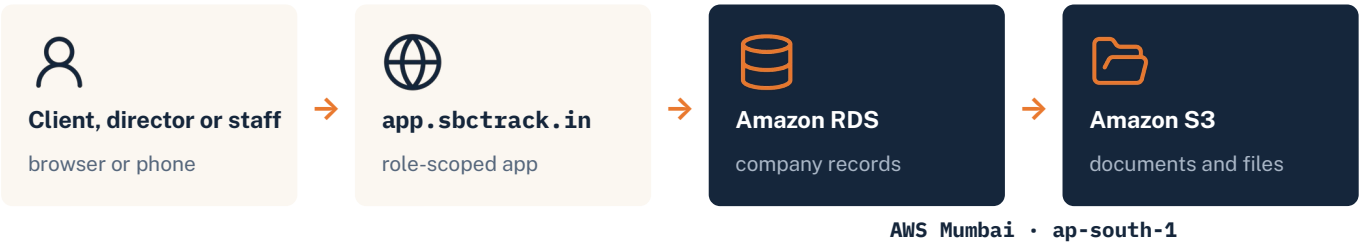

AWS Mumbai

Hosted in AWS ap-south-1, with the database on RDS and documents on S3.

Email is the record

Email is the system of record. WhatsApp is an extra nudge and never blocks an email.

Where the data lives

Suitable for

- New Indian private limited companies and their directors
- Indian subsidiaries of foreign parent companies
- CFOs and finance heads who need one view of compliance and cash
- CA and CS firms who want their clients inside the work

The same rules for everyone. Staff see only the clients they work on, and every change they make is in the audit log.

ONBOARDING

From first call to live in [SBC to confirm] days

SBC sets up the project, the client answers the questionnaire, and the team takes the company through filing to a live compliance calendar, all in the same app.

PHASE 1

Discovery and project setup

- First call on structure and timelines.
- Project created with its lead and manager.
- Client portal logins issued.

[SBC to confirm] weeks

PHASE 2

Questionnaire and checklist

- Client answers the questionnaire.
- The 34-step checklist opens in order.
- Red marks show what is missing.

[SBC to confirm] weeks

PHASE 3

Documents, filing and COI

- MCA drafts generated per director.
- Manager approves, client signs.
- SPICe+ filed; COI received.

[SBC to confirm] weeks

PHASE 4

Registrations and calendar live

- GST and other registrations tracked.
- Yearly compliance calendar generated.
- Reminders and filings register live.

[SBC to confirm] weeks

34

checklist steps tracked on screen from day one

5

roles set up at project start, including the client

[SBC to confirm]

days from first call to certificate of incorporation

What we will ask you for

- **Director and subscriber KYC**
- **Registered office proof**
- **DSC details**
- **Proposed names and capital**

Each item arrives as a request in the client portal, so nothing is lost in email.

After go-live. SBC's team keeps running the compliance calendar with you every month. Each filing is approved by a manager, recorded with its proof in the filings register, and shown in your portal the same day.

WHY VCFO SUITE

Not another tracker. A managed outcome

Ten things set VCFO Suite apart. Together they mean a company is incorporated properly and then kept compliant, by software and a team that answer for the result.

U1

One app from incorporation to compliance

The same record runs from the questionnaire to every annual filing. No hand-over and no re-entry.

U2

Documents write themselves

MCA drafts are generated from the checklist, one set per director, and download as one ZIP.

U3 · U4

Checked work, shared with the client

A manager approves every draft before the client sees it, in the client's own portal and on their phone.

U5 · U6

The app chases and answers

Request lists, expiry and notice alerts and client health run on their own. Ask VCFO answers from the live record.

U7 · U8

The board and the cash, too

Board meetings run end to end, and receivables come with bank matching and a forex desk.

U9 · U10

India-native, with a CA team behind it

SPICe+, REG-01 and the Indian calendar are built in, and SBC's CA and CMA team is accountable for the outcome.

Compared to email + Excel

- ✓ One record, instead of copies in every inbox.
- ✓ Documents generated from answers, not retyped for each director.
- ✓ The client sees status without having to ask.
- ✓ Every action sits in the audit log, not lost in a thread.
- ✓ Reminders and escalations run without anyone remembering them.

Compared to generic practice-management or task tools

- ✓ The 34 SPICe+ steps, REG-01 and the Indian calendar come built in.
- ✓ MCA drafts are generated, not attached by hand.
- ✓ The client gets a portal, not a guest login to a task board.
- ✓ Board meetings and receivables live on the same company record.
- ✓ SBC's CA and CMA team comes with it, accountable for the outcome.

VCFO Suite
BY SBC

GET STARTED

Let’s set up your company properly

Choose where to start. Each option is a conversation with SBC’s team, with the app open on the table.

Live demo

See the checklist, the document pack, the approval gate and the client portal on a working company.

Incorporation consultation

Talk through structure, capital, directors and the order of filings for your new company or Indian subsidiary.

Compliance health check

We load an existing company’s obligations into the calendar and show what is due, late or missing.
